so as to make active use of its hardware components. This turns a machine into an autonomous robot. Since about the mid-nineties of the past century, robot programming has made impressive progress. State-of-the-art robots are able to orient themselves and move around freely in indoor environments or negotiate difficult outdoor terrains; they can use stereo vision to recognize objects and they are capable of simple object manipulation with the help of artificial extremities. At a time where robots perform these tasks more and more reliably, we are ready to pursue the next big step, which is to turn autonomous machines into reasoning robots. A reasoning robot exhibits higher cognitive capabilities like following complex and long-term strategies, making rational decisions on a high level, drawing logical conclusions from sensor information acquired over time, devising suitable plans, and reacting sensibly in unexpected situations. All of these capabilities are characteristics of human-like intelligence and ultimately distinguish truly intelligent robots from mere autonomous machines.

*Programming with Java IDL* Geoffrey Lewis, Steven Barber, Ellen Siegel, 1998. Combining the versatility of Java with the interoperability of CORBA, Java IDL (Interface Definition Language) lets you build object-oriented systems that freely interact over the Internet or intranets regardless of ORB or programming language. Now *Programming with Java IDL* offers Java developers a quick, easy way to fully master this important new Web development tool. With this valuable guide, developers learn Java IDL programming by actually building powerful applications using distributed objects. Experts Geoffrey Lewis, Steven Barber, and Ellen Siegel first bring you up to speed on CORBA, Java, and Java IDL basics. They provide you with step-by-step instructions and source code also available at the companion Web site to build three full-fledged distributed systems of increasing complexity. Then, combining valuable insider tips with business system programming savvy, they show you how to quickly modify the code to build your own powerful custom applications. A hands-on guide to harnessing the power of Java and CORBA to create super-versatile business applications, *Programming with Java IDL* is an indispensable working resource for Java developers. Visit the companion Web site at [www.wiley.com/compbooks/lewis](http://www.wiley.com/compbooks/lewis). There you'll find all the source code from the book, updates on latest developments in Java IDL tools and techniques, and contributors: Henry Balen (Fusion Systems), Pierre Delisle (Sun Microsystems), Bruce E.
