detection is an important topic which has been well studied in diverse research areas and application domains It generally
involves detection of abnormal data unhealthy status fault diagnosis and can be helpful to guarantee industrial systems
stability security and economy As development of intelligent industries and sensor systems grows large amounts of data
become easily available and challenges arise in industrial systems anomaly detection One typical case is the study within
energy related systems like thermal energy renewable energy study e g wind energy photovoltaic electric vehicles and so on
These systems can involve various data formats and more complex data structures making anomaly data detection a
challenge Currently under the development of deep learning and big data analytics many promising results have been
achieved in energy systems anomaly data detection However many challenging problems remain unsolved due to the
