Rise of the Machines George Finney, 2025-05-23 Expert guide to create Zero Trust digital environments in an AI everywhere landscape. *Rise of the Machines: A Project Zero Trust Story* is a continuation of the 2023 bestseller *Project Zero Trust*, picking up where the first book left off and addressing issues not covered in the first installment: artificial intelligence, mergers and acquisitions, antivirus, business continuity, and remote work. Artificial Intelligence is the dominant issue discussed in every chapter, providing a case study based approach to applying zero trust principles to all the various aspects of artificial intelligence: from MLOps used by security teams to use of GPTs, chatbots, and adversarial AI. AI transforms technology by enabling unprecedented automation and decision making, but securing it with a Zero Trust approach is essential because AI inherently relies on trusted data and systems, making it a target for manipulation. The book also includes discussion around regulatory issues and the alignment of regulation around Zero Trust practices. Written by George Finney, 2024 recipient of the Baldrige Foundation Leadership Award for Cybersecurity and recognized as one of the top 100 CISOs in the world in 2022, this book provides key insights on: Applying the four Principles of Zero Trust to AI; Focusing On Business Outcomes; Designing From The Inside Out; Determining Who Or What Needs Access; and Inspecting And Logging All Traffic. Using the five steps of the Zero Trust Methodology to secure AI technologies: Defining Your Protect Surface; Mapping Transaction Flows; Architecting Your Environment; Creating Zero Trust Policies; and Monitoring and Maintaining Your Environment. The evolution of Adversarial AI to scale attacks and how security operations teams can integrate into the Zero Trust strategy to use AI to accelerate defense. *Rise of the Machines: A Project Zero Trust Story* is a timely essential read for all IT professionals across industries including network engineers, system administrators, and cloud architects.
