Total Materials Management Eugene L. Magad, 2013-03-09 Materials management has become an important activity in both manufacturing and service organizations Rapid changes in the industrial environment such as the introduction of automation and Just In Time and demands for increased productivity and quality have increased the need for all personnel to be concerned with total control of materials Clearly this trend will continue and materials management will play an increasingly vital role in organizational success especially for operations that are becoming automated Materials management will be more critical in many service organizations where the materials group has received little attention in the past This book covers the basic materials management function and provides valuable insights into various other major functions related to it We believe that each of these manufacturing marketing finance quality assurance and engineering is vitally involved in materials management and any coverage of the subject that excludes these functions offers too narrow a perspective With increasing demand for materials managers human resource requirements will be satisfied by individuals trained within the discipline and by personnel who have worked in other fields The dimensions of materials management have grown so rapidly that many practicing managers are not aware that they are fulfilling material management functions It is important that all individuals have the basic knowledge required to perform their roles in these organizations *APICS, the Performance Advantage* ,2004 *APICS Certification Program* ,1987 *Knowledge Acquisition at Work* Sylvia Scribner, 1991 *Bibliography of Articles, Books, and Other Sources of Information, Concerning Production and Inventory Management (PIM) and Related Subjects* ,1979 *APICS Certification Program Study Guide* APICS Curricula & Certification Program Council, 1982* **Encyclopedia of Production and Manufacturing Management** Paul M. Swamidass, 2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all

directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field
