Tubular Structures XI Jeffrey A. Packer,Silke Willibald,2006-07-31 This topical book contains the latest scientific and engineering developments in the field of tubular steel structures as presented at the 11th International Symposium and IIW International Conference on Tubular Structures The International Symposium on Tubular Structures ISTS has a long standing reputation

for being the principal showcase for manufactured tubing and the prime international forum for discussion of research developments and applications in this field. Various key and emerging subjects in the field of hollow structural sections are covered such as novel applications and case studies, static and fatigue behaviour of connections, joints, concrete filled and composite tubular members, earthquake resistance, specification and code developments, material properties and structural reliability, impact resistance and brittle fracture, fire resistance, casting and fabrication innovations. Research and development issues presented in this book are applicable to buildings, bridges, offshore structures, entertainment rides, cranes, towers and various mechanical and agricultural equipment. This book is thus a pertinent reference source for architects, civil and mechanical engineers, designers, steel fabricators and contractors, manufacturers of hollow sections or related construction products, trade associations involved with tubing owners or developers of tubular structures, steel specification committees, academics and research students. The conference presentations herein include two keynote lectures, the International Institute of Welding Houdremont Lecture and the ISTS Kurobane Lecture, plus finalists in the CIDECT Student Papers Competition. The 11th International Symposium and IIW International Conference on Tubular Structures, ISTS11, took place in Quebec City, Canada, from August 31 to September 2, 2006.

Engineering Materials, Structures, Systems and Methods for a More Sustainable Future (Alphose Zingoni, 2025-08-20) comprises 275 papers that were presented at SEMC 2025, the Ninth International Conference on Structural Engineering, Mechanics and Computation. This event, held in Cape Town, South Africa, from 1 to 3 September 2025, was attended by around 300 participants from 42 countries worldwide. The Proceedings are divided into 15 sections. The various topics may be grouped into five broad categories covering: i) the mechanics of materials, solids and structures; ii) numerical modelling, computational simulations and experimental testing; iii) analysis, design and construction in the traditional engineering materials; iv) innovative engineering materials, structures and methods; v) maintenance, long term performance, life cycle considerations and sustainable construction. *Engineering Materials, Structures, Systems and Methods for a More Sustainable Future* will be of interest to civil, structural, mechanical, marine and aerospace engineers, as well as planners and architects. Two versions of the papers are available: full papers of length six pages are included in the e-book, while short papers of length two pages, intended to be concise but self-contained summaries of the full papers, are in the printed book.

Design of Steel Structures (ECCS - European Convention for Constructional Steelwork, 2014-01-22) introduces the design concept of Eurocode 3 for steel structures in building construction and their practical application.
