Energy Forecasting and Control Methods for Energy Storage Systems in Distribution Networks William Holderbaum, Feras Alasali, Ayush Sinha, 2023-01-07 This book describes the stochastic and predictive control modelling of electrical systems that can meet the challenge of forecasting energy requirements under volatile conditions The global electrical grid is expected to face significant energy and environmental challenges such as greenhouse emissions and rising energy consumption due to the electrification of heating and transport Today the distribution network includes energy sources with volatile demand behaviour and intermittent renewable generation This has made it increasingly important to understand low voltage demand behaviour and requirements for optimal energy management systems to increase energy savings reduce peak loads and reduce gas emissions Electrical load forecasting is a key tool for understanding and anticipating the highly stochastic behaviour of electricity demand and for developing optimal energy management systems Load forecasts especially of the probabilistic variety can support more informed planning and management decisions which will be essential for future low carbon distribution networks For storage devices forecasts can optimise the appropriate state of control for the battery There are limited books on load forecasts for low voltage distribution networks and even fewer demonstrations of how such forecasts can be integrated into the control of storage This book presents material in load forecasting control algorithms and energy saving and provides practical guidance for practitioners using two real life examples residential networks and cranes at a port terminal

Forecasting with Exponential Smoothing Rob Hyndman, Anne B. Koehler, J. Keith Ord, Ralph D.

Snyder, 2008-06-19 Exponential smoothing methods have been around since the 1950s and are still the most popular forecasting methods used in business and industry. However, a modeling framework incorporating stochastic models, likelihood calculation, prediction intervals, and procedures for model selection was not developed until recently. This book brings together all of the important new results on the state space framework for exponential smoothing. It will be of interest to people wanting to apply the methods in their own area of interest, as well as for researchers wanting to take the ideas in new directions. Part 1 provides an introduction to exponential smoothing and the underlying models. The essential details are given in Part 2, which also provides links to the most important papers in the literature. More advanced topics are covered in Part 3, including the mathematical properties of the models and extensions of the models for specific problems. Applications to particular domains are discussed in Part 4.

Proceedings of the XVII International Symposium SymOrg 2020 Dušan Starčević, Sanja Marinković, 2020-06-30

Ever since 1989, the Faculty of Organizational Sciences, University of Belgrade, has been the host of SymOrg, an event that promotes scientific disciplines of organizing and managing a business. Traditionally, the Symposium has been an opportunity for its participants to share and exchange both academic and practical knowledge and experience in a pleasant and creative atmosphere. This time, however, due to the challenging situation regarding the COVID-19 pandemic, we have decided that all the essential activities planned for the International Symposium SymOrg 2020 should be carried out online, between the 7th and the 9th of September 2020. We are very pleased that the topic of SymOrg 2020, Business and Artificial Intelligence, attracted researchers from different institutions, both in Serbia and abroad. Why is artificial intelligence a disruptive technology? Simply because it significantly alters the way consumers, industries, or businesses operate. According to the European Commission document titled "Artificial Intelligence for Europe 2018," AI is a key disruptive technology that has just begun to reshape the world. The Government of the Republic of Serbia has also recognized the importance of AI for the further development of its economy and society and has prepared an AI Development Strategy for the period between 2020 and 2025. The first step has already been made: the Science Fund of the Republic of Serbia, after a public call, has selected and financed twelve AI projects. This year, more than 200 scholars and practitioners authored and co-authored the 94 scientific and research papers that had been accepted for publication in the Proceedings. All the contributions to the Proceedings are classified into the following 11 sections: Information Systems and Technologies in the Era of Digital Transformation; Smart Business Models and Processes; Entrepreneurship; Innovation and Sustainable Development; Smart Environment for Marketing and Communications; Digital Human Resource Management; Smart E-Business; Quality 4.0 and International Standards; Application of Artificial Intelligence in Project Management; Digital and Lean Operations Management; Transformation of Financial Services; Methods and Applications of Data Science in Business and Society. We are very grateful to our distinguished keynote speakers: Prof. Moshe Vardi, Rice University, USA; Prof. Blaž Zupan, University of Ljubljana, Slovenia; Prof. Vladan Devedić, University of Belgrade, Serbia; Milica Jović, PhD Director.

Science Fund of the Republic of Serbia and Harri Ketamo PhD Founder Chairman of HeadAI Ltd Finland Also special thanks to Prof Dragan Vukmirovi University of Belgrade Serbia and Prof Zoran evarac University of Belgrade Serbia for organizing workshops in fields of Data Science and Machine Learning and to Prof Rade Mati Belgrade Business and Arts Academy of Applied Studies and Milan Dobrota PhD CEO at Agremo Serbia for their valuable contribution in presenting Serbian experiences in the field of AI The Faculty of Organizational Sciences would to express its gratitude to the Ministry of Education Science and Technological Development and all the individuals who have supported and contributed to the organization of the Symposium We are particularly grateful to the contributors and reviewers who made this issue possible But above all we are especially thankful to the authors and presenters for making the SymOrg 2020 a success
