telling the stories of innovators who managed the color cornucopia that modern artificial dyes and pigments made possible. These color stylists, color forecasters, and color engineers helped corporations understand the art of illusion and the psychology of color. Blaszczyk describes the strategic burst of color that took place in the 1920s when General Motors introduced a bright blue sedan to compete with Ford's all-black Model T and when housewares became available in a range of brilliant hues. She explains the process of color forecasting not a conspiracy to manipulate hapless consumers but a careful reading of cultural trends and consumer taste. And she shows how color information flowed from the fashion houses of Paris to textile mills in New Jersey. Today professional colorists are part of design management teams at such global corporations as Hilton, Disney, and Toyota. *The Color Revolution* tells the history of how colorists help industry capture the hearts and dollars of consumers.
