Internal Auditing Urton Anderson, 2014 The internal audit function IAF provides assurance and insight regarding governance risk and control processes within an organization In this regard the IAF performs value added activities for the board management and external auditors as well as various other internal and external stakeholders e.g. investors In this chapter we describe the extant literature on the IAF's role in governance risk and control much of which focuses on the effects of IAF quality on various financial reporting outcomes and on users reliance on the IAF We also discuss research focusing on operational outcomes and the IAF's consulting responsibilities In addition because of the constantly evolving role of the IAF and various changes in governance in general there exist several areas where current understanding is incomplete

We conclude this chapter with a discussion of these knowledge gaps
