## **Modern Lens Antennas For Communications Engineering:**

Modern Lens Antennas for Communications Engineering John Thornton, Kao-Cheng Huang, 2013-03-06 The aim of this book is to present the modern design principles and analysis of lens antennas. It gives graduates and RF Microwave professionals the design insights in order to make full use of lens antennas. Why do we want to write a book in lens antennas? Because this topic has not been thoroughly publicized, its importance is underestimated. As antennas play a key role in communication systems, recent development in wireless communications would indeed benefit from the characteristics of lens antennas: low profile and low cost etc. The major advantages of lens antennas are narrow beamwidth, high gain, low sidelobes, and low noise temperature. Their structures can be more compact and weigh less than horn antennas and parabolic antennas. Lens antennas with their quasi-optical characteristics also have low loss, particularly at near millimeter and submillimeter wavelengths where they have particular advantages. This book systematically conducts advanced and up-to-date treatment of lens antennas.

**Terahertz Planar Antennas for Next Generation Communication** Kumud Ranjan Jha, Ghanshyam Singh, 2014-01-10 This book describes various methods to enhance the directivity of planar antennas, enabling the next generation of high-frequency wireless communication. The authors discuss various applications to the terahertz regime of the electromagnetic spectrum with an emphasis on gain enhancement mechanisms. The numerical models of these antennas are presented, and the analytical results are supported using commercial simulators. The multilayer substrate microstrip transmission line at terahertz frequency is also explored, and a method to obtain the various parameters of this interconnect at high frequency is described. This book will be a valuable resource for anyone needing to explore the terahertz band gap for future wireless communication in an effort to solve the bandwidth spectrum scarcity problem.

Proceedings of the 8th International Conference on Space Science and Communication Mohammad Tariqul Islam, Norbahiah Misran, Mandeep Jit Singh, 2024-03-30 This book presents peer-reviewed articles from the 8th International Conference on Space Science and Communication (ICoSpace 2023) held at Penang in Malaysia. It addresses complications of ground-breaking initiatives and solutions for space science and communications research, telecommunications, and meteorology. With the theme "Advanced Space Technology Accelerating Global Agenda," it will provide valid information to understand trends, evaluate needs, and create global development policies and programs in the best interest of all. It brings together researchers, engineers, geospatialists, meteorologists, astronomers, and practitioners in order to present the latest applications in space science, telecommunications, meteorology, remote sensing, and related fields.
