[Local Polynomial Modelling and Its Applications](#) Jianqing Fan, Irene Gijbels, 2018-05-02 Data analytic approaches to regression problems

arising from many scientific disciplines are described in this book The aim of these nonparametric methods is to relax assumptions on the form of a regression function and to let data search for a suitable function that describes the data well The use of these nonparametric functions with parametric techniques can yield very powerful data analysis tools Local polynomial modeling and its applications provides an up to date picture on state of the art nonparametric regression techniques The emphasis of the book is on methodologies rather than on theory with a particular focus on applications of nonparametric techniques to various statistical problems High dimensional data analytic tools are presented and the book includes a variety of examples This will be a valuable reference for research and applied statisticians and will serve as a textbook for graduate students and others interested in nonparametric regression
