

CHAPTER 8

CONCRETE STRUCTURES AND FOUNDATIONS¹

FOREWORD

The material in this chapter is written with regard to typical North American Railroad Concrete Structures and Foundations, and other related structures and facilities.

- Nonbearing Walls
- Typical Road Structures (pavement and bridge supports, etc.)
- Types of Bridge (up to 100 spans and pierages) under spans through

Additional special provisions for spans higher than those listed above may be added to the Chapter Appendices.

This chapter is presented in 2 sections. Section 8.1 contains a general discussion of railroad bridge construction being referred to in railroad practice and design, including and highlighting Common Features and Transactions used for railroads. The recommendations provided herein are for design and construction, all items in the case of known loads, and correct design and construction practice. These recommendations are intended for general use and might not provide sufficient criteria for unusually demanding conditions. Professional judgment must be exercised when applying the recommendations of this chapter as part of an overall solution to any particular case.

This chapter is published separately, incorporating no items made in the previous code. The first published edition of this chapter should be used, together with the applicable existing sections. The purpose of publishing technical recommendations under such an existing section was to have them built and maintained. It was never intended to require previous editions of the chapter. However, when technical recommendations differ from the recommendations contained in the more published editions of the section, the recommendations of the later published edition of the chapter should be used.

Part 8, Road (Type) Concrete Bridges, was deleted from the Manual in 1975. Part 8, Reinforced Concrete Trestles, was deleted from the Manual in 1977. Part 11 is deemed to have been Part 11, Concrete Bridge Supports, as defined in Chapter 11 of 1964.

¹ The scope of the separate chapters in this volume should be fully understood in relation to recommendations regarding construction practices to be followed. Some recommendations are for design and construction, all items in the case of known loads, and correct design and construction practice. These recommendations are intended for general use and might not provide sufficient criteria for unusually demanding conditions. Professional judgment must be exercised when applying the recommendations of this chapter as part of an overall solution to any particular case.
