2. The Federal Reserve Bank was established to help the government keep the money supply and prices stable every month and year.

3. The money bill. There was a funding crisis in 1917 when banks had the money they had lent to the government, but not the money they had loaned to their customers to buy stocks and bonds.

4. Many banks closed in the late 1920s and early 1930s because they did not have any more money. The money they had loaned, money that banks had lent to their customers, had been used to buy stocks and bonds. However, the banks didn't have the money to buy the deposits, and so had to close. The money had to flow.

5. The goal of the FDIC is to help people who are in difficulty by depositing money in the FDIC.

6. They passed laws to help the government to help people who are having trouble to sell it. They thought that government should help them. But, however, had to be set up for private individuals and institutions to help help, and the government.

7. They created the early payment of their military loans.
