- Every release of Perl comes with documentation in a set of files. Most releases have over 1,700 pages of documentation included in reference books, user guides, FAQs, and so on.
- On most operating systems, a utility called `perldoc` is installed as part of the Perl system. The `perldoc` utility can search for and format Perl documentation for you. To use `perldoc` to look up the basic syntax for perl, open a terminal or console and issue the command:

```
perldoc perl
```
