The Enduring Enterprise Devin DeCiantis, Ivan Lansberg, 2024-11-26 Family businesses thrive in some of the world s toughest environments providing vital lessons for businesses everywhere The bulk of the world s growth in population and economic activity in the foreseeable future will be generated in the developing world This is precisely where enterprising families dominate operating very differently than their peers in more stable and affluent nations These businesses not only survive but actually thrive in turbulent times enduring wars lawlessness market failures environmental disasters and more The world s most advanced economies will increasingly experience these types of structural shocks and chronic uncertainties in the years ahead The question is what can they do about it In The Enduring Enterprise Devin DeCiantis and Ivan Lansberg bring readers into the lives of families operating in emerging and frontier economies who rely on a unique portfolio of stabilizing strategies to create islands of trust resilience and prosperity amidst persistent turmoil Yet these tactics can also be deployed by any business coping with extended periods of volatility or building a more systematic approach to managing risk Drawing on real cases from around the world and on their extensive research and consulting experience with family enterprises globally The Enduring Enterprise will provide business leaders everywhere with new and useful adaptive strategies proven to work in the toughest conditions to help them face the world of greater uncertainty that lies ahead

AI, Automation, and War

Anthony King,2025-08-19 Why AI will not replace human strategic judgement in war Is AI about to automate war Will autonomous drone swarms and killer robots controlled by AI dominate the battlespace and determine the winner In AI Automation and War Anthony King debunks this science fiction tinged narrative of AI s military potential exploring instead the actual applications of AI by the armed forces over the last decade He finds that AI is not going to replace human commanders and combatants the machines are not about to take over Rather the military has used and will continue to use AI to process data at a scale and speed that exceeds the capacity of humans AI will be used primarily to improve military understanding and intelligence King explains that military commanders enabled by the data processing power of AI will be able to see the battlespace at a previously unattainable depth fidelity and speed AI will help the armed forces plan target and conduct cyber operations faster and more effectively In order to harness AI in this way however a radical organisational transformation is taking place The armed forces are integrating civilian technologists into operational headquarters to work alongside military staff This partnership between the armed forces and the technology sector signals the emergence of a military tech complex that promises to be as powerful in this century as the military industrial complex was in the last
