**Clinician's Guide to Medical Writing** Robert B. Taylor, 2006-03-20 This book is for the clinician who wants to write It is for the physician physician assistant or nurse practitioner who sees patients and who wants to contribute to the medical literature You may be an assistant professor aspiring to promotion or a clinician in private practice who seeks the personal enrichment that writing can bring If you are new to medical writing or even if you have been the author of some articles or book chapters and seek to improve your abilities this book can help you Who am I that I can make this assertion and write this book both fairly presumptuous Here's my reasoning As a practicing physician writing has been my avocation unlike the authors of many other writing books I am not a journal editor Over 14 years in private practice and 26 years in academic medicine I have written all the major models described in this book review articles case reports editorials letters to the editor book reviews book chapters edited books authored books and reports of clinical research studies Most have been published Not all Perhaps my most significant qualification is not that I have managed to produce a lengthy curriculum vitae In my opinion what is more important for you the reader is that I have made all the errors That's right the mistakes

*Medical Writing for Smart People* Bonny McClain, 2015-06-23 Writing professionally for almost 20 years I appreciate the nuance of different aspects of medical writing I define a medical writer as developing content about the practice of clinical medicine clinical research or the health policy and economics influencing decisions at the point of care I

distinguish the role of a scientific writer as being more directed toward a lay audience Personally unable to claim success at nailing 8th grade level a la Flesch Kincaid writing I stopped trying after a client asked me to describe a ureter based on its resemblance to spaghetti And then I was subsequently fired for the apparent important lack of the marketable skill Or when challenged to write National Institute of Health NIH Congressional Justifications for government funding informed the writing had to be 8th grade level or it couldn't go to congress for review Yes Really My original perspective for this book was along the lines of Anthony Bourdain in Kitchen Confidential a raw informative but not always pretty account of the medical writer's daily life Thinking of the repercussions of telling such a substantive story I recall an Anne Lamott quote You own everything that happened to you Tell your stories If people wanted you to write warmly about them they should have behaved better
