

# Managing PM in Budget 7

Project Management (PM) is a discipline that involves the application of knowledge, skills, and tools to project activities to meet the project objectives. It is a critical component of any project, ensuring that the project is completed on time, within budget, and to the satisfaction of the stakeholders.

The project lifecycle is divided into four main phases: Initiation, Planning, Execution, and Monitoring & Control. Each phase has specific tasks and deliverables that must be managed effectively to ensure the project's success.

During the Initiation phase, the project manager identifies the project's purpose and scope. This involves defining the project's goals, objectives, and the resources required to complete the project. The project manager also identifies the stakeholders and their interests in the project.

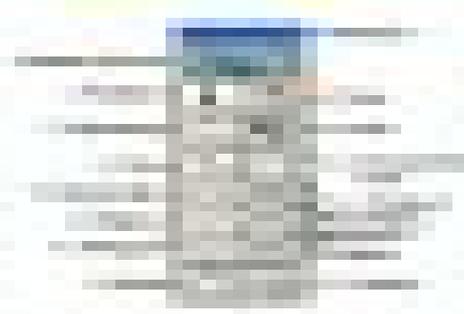

In the Planning phase, the project manager develops a detailed project plan. This includes defining the project's scope, schedule, budget, and risk management strategy. The project manager also identifies the project's key milestones and deliverables.

The Execution phase is the most visible part of the project, where the project manager leads the team in completing the project's tasks. This involves managing the project's resources, communicating with the stakeholders, and monitoring the project's progress.

Finally, in the Monitoring & Control phase, the project manager tracks the project's performance against the project plan. This involves identifying any deviations from the plan and taking corrective action to ensure the project is completed on time and within budget.
