Ophthalmology For Medical School and Beyond is a concise reference text for the medical undergraduates and residents but
the contents will also benefit family physicians who really are the first line of eye care givers in the community Highly
illustrated with 200 colour clinical pictures and illustrations the book is written by the multi disciplinary faculty of the
Department of Ophthalmology National University Health System Singapore The authors constantly asked themselves how
much is too much and deliberately attempted to weed out any excess for the benefit of the target readers The content is
written in a point format with lucid language Emphasis has been focused on information that constitutes essential ophthalmic
core conditions and problems of the current medical undergraduate curriculum Every section in the book has learning
objectives and a take home message to facilitate quick learning The book embraces a practical guide to the study of ocular
diseases basic methods of investigations and treatment where applicable *Essentials Of Ophthalmology: For Medical*

team from the Department of Ophthalmology at the National University Health System in Singapore the 2nd Edition of

Essentials of Ophthalmology For Medical School and Beyond is a significantly improved version of the much appreciated first edition. The original purpose of this publication remains the same to serve as a comprehensive reference book for medical undergraduates, residents, and family physicians who are often the first line of eye care providers in the community. The book is designed to cover all the Entrusted Professional Activities (EPAs) mandated by the Undergraduate Ophthalmology curriculum in Singapore. The chapters have been thoroughly revised with the addition of new clinical images and expanded coverage of ophthalmic conditions. This edition also introduces three new chapters: one on basic electrophysiology which aims to clarify the complex electrical responses of the retina and visual pathway to light; another on biostatistics intended to inspire students to engage in basic research; and a comprehensive chapter on the End of Posting Test (EOPT) featuring scenario-based questions and answers from every subspecialty in ophthalmology which will be invaluable for students preparing for assessments. The original point format including learning objectives and take-home messages has been preserved to facilitate easy reading and quick learning. With nearly 250 high-resolution clinical images, this book now serves as an even more practical guide to studying ocular diseases along with the basic methods of investigation and treatment where applicable. Written by experts from every subspecialty for undergraduate medical students, the book is concise and well-illustrated with high-resolution clinical pictures and distinguished by its point format and inclusion of learning objectives and take-home messages.

Essentials of Ophthalmology Haixia Zhao (Ophthalmology professor), 2018. **Textbook of Ophthalmology** Sanjeev Mittal, Raj Agarwal, 2025-09-03. Simplified Overview of the Clinical Ophthalmology for the Students. Textbook of Ophthalmology is an essential book written to cater to the needs of undergraduate students and covers all the theoretical and practical topics of ophthalmology. It emphasizes the gradual understanding of all aspects of anatomy, physiology, pathological disorders, necessary investigations, and recommended management. Consisting of 28 chapters, the topics begin with anatomy and physiology of vision and further describe all the intraocular structures and their related disorders, intraocular tumors, and injuries. Separate chapters have been included for ocular manifestations in neurological and systemic disorders. The last chapter on community ophthalmology highlights the latest updates in the National Program for Control of Blindness. Key Features: The text is as per the latest competency-based MCI curriculum. It is written in a simple language with gradual progression of the content from the basics of anatomy and physiology to the pathology of different disorders. Understanding and reciprocation of the topics are made easier with algorithms, tables, along with more than 300 clinical images and illustrations. Applied aspects have been highlighted in the boxes. This book is a must for MBBS students.
