the 51 largest US electric utilities across a range of energy efficiency metrics The metrics fall into three categories critical to  
utility sector efficiency 1 quantitative savings and spending performance 2 program diversity and emerging areas and 3  
targets business models and evaluation Eversource MA and National Grid MA both performed best tying for the top spot The  
other top 10 utilities include Pacific Gas Electric Baltimore Gas Electric Eversource CT Southern California Edison San Diego  
Gas and Electric Commonwealth Edison Portland General Electric Xcel Colorado and Xcel Minnesota The Scorecard gives  
utilities regulators and other stakeholders a baseline and roadmap they can use to track performance and strengthen utility

Borochin,2019 How does a public electric utility company optimize its capital budget for grid reliability We illustrate an  
economically optimal way to allocate funding these efforts using circuit level data from Eversource Energy to quantify the  
benefits to tree trimming treatments over the period of 2013 2017 A real options framework allows us to quantify in dollar  
terms the uncertain benefits in terms of customer outages avoided relative to known costs of treatment We find that the less  
costly Standard Maintenance Trimming SMT is economically effective for all circuit types observed in Eversource s CT grid  
while the more extensive Enhanced Tree Trimming ETT is effective on dense circuits only Compared to this model a  
traditional discounted cash flow model leads to underinvestment in grid resilience and ignores both uncertainty in estimates  
and the ability to change policy based on its efficacy
