Two supplements containing additions and corrections were also issued annually. The Register contains the names, details, and characters of Yachts classed by the Society together with the particulars of other Yachts which are considered to be of interest. The Oil Engine and Gas Turbine, 1959 *Modern Marine Internal Combustion Engines* Ievgen Bilousov, Mykola Bulgakov, Volodymyr Savchuk, 2020-06-30. This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas diesel engines, and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g., their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development, and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine depicting its main design features. This book offers a unique self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture, marine engineering, with their design projects at both master and graduate levels, thus filling an important gap in the literature.

Register of Ships, 1993 **Pounder's Marine Diesel Engines and Gas Turbines** Doug Woodyard, 2009-08-18. Since its first appearance in 1950, Pounder's Marine Diesel Engines has served seagoing engineers, students of the Certificates of Competency examinations, and the marine engineering industry throughout the world. Each new edition has noted the changes in engine design and the influence of new technology and economic needs on the marine diesel engine. Now in its ninth edition, Pounder's retains the directness of approach and attention to essential detail that characterized its predecessors. There are new chapters on monitoring, control, and HiMSEN engines, as well as information on developments in electronic controlled fuel injection. It is fully updated to cover new legislation, including that on emissions, and provides details on enhancing overall efficiency and cutting CO₂ emissions. After experience as a seagoing engineer with the British India Steam Navigation Company, Doug Woodyard held editorial positions with the Institution of Mechanical Engineers and the Institute of Marine Engineers. He subsequently edited *The Motor Ship* journal for eight years before becoming a freelance editor specializing in shipping, shipbuilding, and marine engineering. He is currently technical editor of *Marine Propulsion and Auxiliary Machinery*, a contributing editor to *Speed at Sea*, *Shipping World*, and *Shipbuilder*.
