OpenIntro Statistics David Diez, Christopher Barr, Mine Çetinkaya-Rundel, 2013-05-17 Note that this book has a different ISBN than the copies found on Amazon It is an official version of OpenIntro Statistics but it is listed under a separate ISBN to allow lower pricing on CreateSpace for bulk or international orders All OpenIntro Statistics copies are sold royalty free The reason the price is lower here than on Amazon is that the fees for selling through CreateSpace are lower than through Amazon The downside is that buyers must pay for shipping on CreateSpace whereas shipping is often free on Amazon and the net price there tends to be the cost effective option for most buyers

Statistics by Simulation Carsten F. Dormann, Aaron M. Ellison, 2025-06-03 An accessible guide to understanding statistics using simulations with examples from a range of scientific disciplines Real world challenges such as small sample sizes skewed distributions of data biased sampling designs and more predictors than data points are pushing the limits of classical statistical analysis This textbook provides a new tool for the statistical toolkit data simulations It shows that using simulation and data generating models is an excellent way to validate statistical reasoning and to augment study design and statistical analysis with planning and visualization Although data simulations are not new to professional statisticians Statistics by Simulation makes the approach accessible to a broader audience with examples from many fields It introduces the reasoning behind data simulation and then shows how to apply it in planning experiments or observational studies developing analytical workflows deploying model diagnostics and developing new indices and statistical methods Covers all steps of statistical practice from planning projects to post hoc analysis and model checking Provides examples from disciplines including sociology psychology ecology economics physics and medicine Includes R code for all examples with data and code freely available online Offers bullet point outlines and summaries of each chapter Minimizes the use of jargon and requires only basic statistical background and skills

Reshaping STEM Education: Strategies for Curriculum Decolonization and Institutional Transformation Zahid Pranjol, Alia Amir, 2025-11-13 The field of STEM higher education is currently grappling with the imperative need for transformative discourse to address its historical epistemological and colonial underpinnings Despite significant advancements in STEM disciplines there remains a critical gap in inclusivity and equity within higher educational institutes Recent studies have highlighted the persistent colonial structures that shape STEM education often marginalizing diverse voices and perspectives Efforts to decolonize STEM education are gaining momentum yet there is a pressing need for comprehensive research and reflective insights to uproot these entrenched structures This research topic aims to address these gaps by fostering a robust dialogue that transcends traditional boundaries promoting a deeper understanding of the challenges and opportunities in reshaping STEM education through decolonial lenses This research topic aims to provide a scholarly platform for researchers educators and practitioners to contribute groundbreaking research and reflective insights

on decolonizing STEM higher education The primary goal is to facilitate a robust dialogue that transcends traditional boundaries fostering a deeper understanding of the challenges and opportunities in reshaping STEM education through decolonial lenses
