Machine Learning Proceedings 1995 Discriminant Analysis and Statistical Pattern Recognition Geoffrey J. McLachlan, 2004-08-04 The Wiley Interscience Paperback Series consists of selected books that have been made more accessible to consumers in an effort to increase global appeal and general circulation With these new unabridged softcover volumes Wiley hopes to extend the lives of these works by making them available to future generations of statisticians mathematicians and scientists For both applied and theoretical statisticians as well as investigators working in the many areas in which relevant use can be made of discriminant techniques this monograph provides a modern comprehensive and systematic account of discriminant analysis with the focus on the more recent advances in the field SciTech Book News a very useful source of information for any researcher working in discriminant analysis and pattern recognition Computational Statistics Discriminant Analysis and Statistical Pattern Recognition provides a systematic account of the subject While the focus is on practical considerations both theoretical and practical issues are explored Among the advances covered are regularized discriminant analysis and bootstrap based assessment of the performance of a sample based discriminant rule and extensions of discriminant analysis motivated by problems in statistical image analysis The accompanying bibliography contains over 1 200 references

The Top Ten Algorithms in Data Mining Xindong Wu, Vipin Kumar, 2009-04-09 Identifying some of the most influential algorithms that are widely used in the data mining community The Top Ten Algorithms in Data Mining provides a description of each algorithm discusses its impact and reviews current and future research Thoroughly evaluated by independent reviewers each chapter focuses on a particular algorithm and is written by either the original authors of the algorithm or world class researchers who have extensively studied the respective algorithm The book concentrates on the following important algorithms C4.5 k-Nearest Neighbors SVM Apriori EM PageRank AdaBoost k-NN Naive Bayes and CART Examples illustrate how each algorithm works and highlight its overall performance in a real world application The text covers key topics including classification clustering statistical learning association analysis and link mining in data mining research and development as well as in data mining machine learning and artificial intelligence courses By naming the leading algorithms in this field this book encourages the use of data mining techniques in a broader

realm of real world applications It should inspire more data mining researchers to further explore the impact and novel research issues of these algorithms

Trends and Perspectives in Linear Statistical Inference Mújgan Tez,Dietrich von Rosen,2018-02-01 This volume features selected contributions on a variety of topics related to linear statistical inference The peer reviewed papers from the International Conference on Trends and Perspectives in Linear Statistical Inference LinStat 2016 held in Istanbul Turkey 22 25 August 2016 cover topics in both theoretical and applied statistics such as linear models high dimensional statistics computational statistics the design of experiments and multivariate analysis The book is intended for statisticians Ph D students and professionals who are interested in statistical inference

Juvenile Hormones and Juvenoids James Devillers,2013-05-06 Juvenile hormones JHs are a group of structurally related sesquiterpenes secreted by the insect corpora allata They affect most insect life cycle stages and physiological functions including embryogenesis larval and adult development metamorphosis reproduction metabolism diapause polyethism and migration Juvenoids such as methoprene hydroprene kinoprene pyriproxyfen and fenoxycarb are man made chemicals that mimic the structure and or activity of JHs selectively targeting and disrupting the endocrine system of insects They are particularly suited as larvicides for the control of pest and disease vectoring insects such as mosquitoes Juvenile Hormones and Juvenoids Modeling Biological Effects and Environmental Fate discusses the various modeling approaches that can be used to study the mechanism of action of JHs in insects and to estimate the adverse effects and the environmental fate of the juvenoids that mimic their activity This book is the third of the QSAR in Environmental and Health Sciences series but the first dedicated to the use of QSAR and other in silico techniques to provide these insights into JHs and their analogs With contributions by an international team of scientists the book begins with a historical survey of JHs and juvenoids It then discusses biosynthesis of sesquiterpenoids followed by chapters covering JH activity such as morph specific JH titers in crickets and JH analog activity including soldier specific organ development in termites and the role of methoprene in gene transcription The book examines modeling approaches applied to resistance to JH analogs to population dynamics of nontarget species in the presence of juvenoids and to SAR and QSAR of JH mimics The book concludes with a discussion on the use of multicriteria analysis for selecting insecticides for vector control
