# Unit 1: Introduction to the Essentials of Business Communication

---

## 1. Meaning of Business Communication

Business communication is the purposeful exchange of information, ideas, facts, instructions, and emotions within a business environment to facilitate smooth operations and achieve organizational goals. It may occur between individuals or groups inside the organization (internal communication), or with external parties such as clients, vendors, and the public (external communication). Unlike casual conversation, business communication is structured, targeted, and often documented.

It includes both spoken and written interactions, as well as non-verbal cues like gestures and facial expressions. The goal is to ensure clarity, coordination, collaboration, and trust. For example, when a manager instructs their team about a new policy or when a salesperson discusses product details with a client, both are instances of business communication.

---

## 2. Process of Business Communication

The communication process consists of several interrelated steps that must occur for a message to be successfully conveyed and understood. Any breakdown in this process can lead to miscommunication and inefficiency.

### • Elements of the Communication Process:

1. **Sender:** The originator of the message. They have an idea or intention that needs to be shared.
2. **Encoding:** This involves converting the idea into understandable symbols — such as words, images, gestures, or sounds.
