Development in Context Tara L. Kuther, 2023-02-24 Award-winning author Tara Kuther presents Lifespan Development in Context, Second Edition, a topically oriented edition of her bestselling text that provides a panoramic view of the many influences that shape human development. Kuther's student-friendly narrative illustrates how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change throughout our lives. Three core themes resonate throughout each chapter and across each developmental domain and topic: the centrality of context, the importance of research, and the applied value of developmental science. Foundational theories and classic studies are woven together with contemporary research and culturally diverse perspectives for a full, updated introduction to the field that is both comprehensive and concise. Case studies, real-world applications, and video examples ignite critical thinking and class discussion, ensuring students have the tools they need to apply course concepts to their lives and future careers.

It features a more concise narrative with streamlined key concepts that are more straightforward and engaging for students. Now presented in three sections: Communication and Family, Lenses: Communication and Family, Cohesion and Communication, and Family Adaptability, this edition's new features include learning objectives for each chapter, Family Portrait interviews with top scholars, a glossary of key definitions, and expanded Family Reflections discussion questions interspersed in the text. Saenz, 2002 **The Psychobiology of Trauma and Resilience Across the Lifespan** Douglas L. Delahanty, 2008-09-05 Research has suggested that childhood experiences confer risk, resilience, for reactions to trauma in adulthood, and predictors and correlates of posttraumatic stress disorder (PTSD) appear to differ.

developmentally Research in PTSD has typically been conducted by either child or adult researchers with relatively little overlap or communication between the two camps Developmental models of PTSD are necessary to fully understand the complex constellation of responses to trauma across the lifespan Such models can inform study designs and lead to novel developmentally appropriate interventions To this end this book is organized in such a way as to present and integrate research into child adult and older adult trauma samples in an attempt to culminate in a testable model of PTSD risk and resilience across the lifespan Each author incorporates a developmental slant to their individual chapter and the chapters are organized to highlight potential differences in our understanding of risk and resiliency between children and adults Initial chapters concerning pre and peri traumatic risk factors for PTSD lead into chapters reviewing specific risk and resilience factors in adults and children Additional chapters focus on the impact of childhood trauma on adult functioning and the biology of PTSD in children adults and older adults As PTSD rarely occurs in a pure form specific chapters focus on the impact of comorbid disorders in our understanding of PTSD and the final chapters consider both psychosocial and pharmacological treatments for PTSD in children and adults
