

THINKING FAST AND SLOW

DANIEL KAHNEMAN

SYSTEM 1

Fast and intuitive. It operates automatically and quickly, with little or no effort and no sense of voluntary control.

SYSTEM 2

Slow and lazy. Allocates attention to the effortful mental activities that demand it, including complex computations.

System 1 makes most of the decisions, it minimizes effort and optimizes mental performance, but for that it makes some mistakes and operates with bias in specific situations. Learn how to protect yourself.

HOW DOES SYSTEM 1 DECEIVE US?

EGO DEPLETION

If you have to force yourself to do something, you are less willing or able to exert self control when the next challenge comes around.

PRIMING EFFECT

System 1 makes associations. After reading words with an elderly theme, students walk more slowly.

COGNITIVE EASE

Being in a good mood and relaxed encourages the use of system 1. You like what you see, believe what you hear.

W.Y.S.I.A.T.I.

What You See Is All There Is

System 1 creates a coherent story with the available information, regardless of the quality of the information.

JUMP TO CONCLUSIONS

Recent events and current context have the most weight in determining interpretation.

ILLUSION OF CAUSALITY

System 1 is adept at finding a coherent causal story that links the fragments of knowledge at its disposal.

HOW DOES IT AFFECT OUR JUDGMENT?

Our mind is strongly biased toward causal explanations and does not deal well with mere statistics

LAW OF SMALL

Small samples yield extreme results more often than large samples do. System 1 constructs stories that are as coherent as possible. (WYSIATI)

ANCHORING EFFECT

People's judgements are influenced by an obviously uninformative number.

REGRESSION TO THE MEAN

System 1 looks for the causal relationship when in fact there is only random variation, a regression to the mean.

WHY ARE WE BLIND?

"We can be blind to the obvious, and we are blind to our blindness."

NARRATIVE FALLACY

How flawed stories of the past shape our views of the world and our expectations for the future.

HINDSIGHT BIAS

A general limitation of the human mind is its imperfect ability to reconstruct past states of knowledge, or beliefs that have changed.

PLANNING FALLACY

We tend to overestimate our plans and forecasts. Our estimates are closer to a best-case scenario than to a realistic one.

HOW DO OUR CHOICES DEVIATE FROM RATIONALITY?

ECONS are rational by definition, but there is overwhelming evidence that HUMANS cannot be.

LOSS AVERSION

The fear of losing \$100 is more intense than the hope of gaining \$150. Loss aversion ratio = 2 (on average).

ENDOWMENT EFFECT

Owning the good appeared to increase its value. Giving up a bottle of nice wine is more painful than getting an equally good bottle is pleasurable.

MENTAL ACCOUNTS

We hold our money in different mental accounts. There is a clear hierarchy in our willingness to draw on these accounts to cover current needs.

RARE EVENTS

Highly unlikely events are ignored or overweighted.

Recognize the signs that you are in a cognitive minefield, slow down, and ask for reinforcement from system 2

This short summary of *Thinking Fast and Slow* by Daniel Kahneman includes historical context, part-by-part summaries, detailed timeline of key events, important quotes, fascinating trivia, glossary of terms, supporting material to enhance your understanding of the source work. About *Thinking Fast and Slow* by Daniel Kahneman, Nobel Prize-winning psychologist Daniel Kahneman explores the mysteries of intuition, judgment bias, and logic in the international bestseller *Thinking Fast and Slow*. His award-winning book explains the different ways people think whether they're deciding how to invest their money or how to make friends. Kahneman's experiments in behavioral economics in collaboration with cognitive psychologist Amos Tversky led to a theory of two systems of thought: the fast thinking used when ducking a blow and slow thinking that's better employed for making major life decisions. Applying these psychological concepts to different facets of our lives, Kahneman demonstrates how to better understand your own decision making and the choices made by others. The summary and analysis in this ebook are intended to complement your reading experience and bring you closer to great work of nonfiction. **WORKBOOK for Thinking, Fast and Slow by Daniel Kahneman** Bridget Wright, 2021-03-07

Thinking, Fast and Slow Daniel Kahneman, 2013-04-02 For use in schools and libraries only. A Nobel Prize-winning psychologist draws on years of research to introduce his machinery of the mind model on human decision making to reveal the faults and capabilities of intuitive versus logical thinking, providing insights into such topics as optimism, the unpredictability of happiness, and the psychological pitfalls of risk taking. *Summary of Thinking, Fast and Slow* Instaread Summaries, 2016-04-06 *Summary Of "Thinking, Fast And Slow - By Daniel Kahneman"* Sapiens Editorial, 2017-10-06 DESCRIPTION OF THE ORIGINAL BOOK *Thinking fast and slow* is a book in which we're presented with a synthesis of studies carried out by the author Daniel Kahneman. Daniel won a Economics Nobel Prize award. The main topic of the book is the way humans think which influences our daily lives. The work presents the dichotomy between two ways of thinking which the author calls systems. The first system is fast, instinctive, and emotional; the second one is slow, more rational, and logical. Each of these entails cognitive and behavioural characteristics. From a highly original and logical hypothesis, a vision is presented which shapes the routine of decision making that people make in their daily lives. This book is recommended for professionals in the psychology field, as well as for anyone interested in knowing themselves better and the processes involved in their decisions with the means to acquire tools which allow them to reach the path leading to their happiness.

Daniel Kahneman & *Thinking, Fast and Slow* Thrownfield Ashford, Every day people make hundreds of decisions, some small and unnoticed, others powerful enough to shape the course of their lives. From the moment we wake up, our minds are constantly evaluating choices, judging situations, and reacting to the world around us. Yet most of these decisions happen so quickly that we rarely stop to wonder how our thinking truly works. In Daniel Kahneman's *Thinking Fast and Slow: Understanding How Your Mind Shapes Decisions and Actions*, Thrownfield Ashford invites readers on a fascinating journey

into the hidden mechanics of the human mind The story begins with a simple but powerful discovery the human brain operates through two very different ways of thinking One system works quickly automatically and effortlessly guiding our instincts impressions and immediate reactions The other system works more slowly and carefully analyzing complex problems weighing evidence and helping us make deliberate choices Through engaging storytelling and thought provoking examples this book explores how these two systems of thinking influence everything from everyday judgments to life changing decisions Readers will discover why people often trust their instincts why certain mistakes in judgment occur so frequently and how emotions and mental shortcuts quietly shape our choices Drawing inspiration from the groundbreaking ideas associated with Daniel Kahneman s research in psychology and behavioral economics the book reveals the surprising patterns behind human behavior It explores how biases influence perception how overconfidence can distort reasoning and why the human mind sometimes struggles to interpret risks and probabilities accurately But this journey is not simply about understanding mistakes in thinking It is about learning how awareness can transform the way we make decisions As the narrative unfolds readers begin to see their own thought processes more clearly They learn how slowing down their thinking at the right moments can improve judgment strengthen problem solving skills and lead to wiser choices in work relationships and everyday life At its heart *Thinking Fast and Slow* is a story about self awareness It reminds us that the human mind is both powerful and imperfect but with the right understanding people can learn to think more clearly act more wisely and make better decisions in an increasingly complex world Because sometimes the most important discoveries are not about the world around us but about the way our own minds work
