A Tutorial on Elliptic PDE Solvers and Their Parallelization Craig C. Douglas, Gundolf Haase, Ulrich Langer, 2003-01-01 This compact yet thorough tutorial is the perfect introduction to the basic concepts of solving partial differential equations PDEs using parallel numerical methods In just eight short chapters the authors provide readers with enough basic knowledge of PDEs discretization methods solution techniques parallel computers parallel programming and the run time behavior of parallel algorithms to allow them to understand develop and implement parallel PDE solvers Examples throughout the book are intentionally kept simple so that the parallelization strategies are not dominated by technical details

Computational Methods of Linear Algebra Granville Sewell, 2005-09-19 Learn to write programs to solve linear algebraic problems The Second Edition of this popular textbook provides a highly accessible introduction to the numerical solution of linear algebraic problems Readers gain a solid theoretical foundation for all the methods discussed in the text and learn to write FORTRAN90 and MATLAB r programs to solve problems This new edition is enhanced with new material and pedagogical tools reflecting the author s hands on teaching experience including A new chapter covering modern supercomputing and parallel programming Fifty percent more examples and exercises that help clarify theory and demonstrate real world applications MATLAB r versions of all the FORTRAN90 programs An appendix with answers to selected problems The book starts with basic definitions and results from linear algebra that are used as a foundation for later chapters The following four chapters present and analyze direct and iterative methods for the solution of linear systems of equations linear least squares problems linear eigenvalue problems and linear programming problems Next a chapter is devoted to the fast Fourier transform a topic not often covered by comparable texts The final chapter features a practical introduction to writing computational linear algebra software to run on today s vector and parallel supercomputers Highlighted are double precision FORTRAN90 subroutines that solve the problems presented in the text The subroutines are carefully documented and readable allowing students to follow the program logic from start to finish MATLAB r versions of the codes are listed in an appendix Machine readable copies of the FORTRAN90 and MATLAB r codes can be downloaded from the text s accompanying Web site With its clear style and emphasis on problem solving this is a superior textbook for upper level undergraduates and graduate students

Computational Methods Of Linear Algebra (3rd Edition) Granville Sewell, 2014-07-07 This book presents methods for the computational solution of some important problems of linear algebra linear systems linear least squares problems eigenvalue problems and linear programming problems The book also includes a chapter on the fast Fourier transform and a very practical introduction to the solution of linear algebra problems on modern supercomputers The book contains the relevant theory for most of the methods employed It also emphasizes the practical aspects involved in implementing the methods Students using this book will actually see and write programs for solving linear algebraic problems Highly readable FORTRAN and MATLAB codes are presented which solve all of the main problems
