Drawing Standards & Planning Principles

Before starting for drawing, students should know some standards and drawing office practices which are followed in different Civil Engineering Departments of our country.

Clauses, tables and figures on pages 1 to 4 are being reproduced with the permission of I.S.I. from I.S. 962 : 1967 ("Indian Standard Code of Practice for Architectural and Building Drawings") so that the students may be familiar with the drawing standards and practices.

Layout of Drawings

The layout of drawings shall be such as to facilitate the reading of drawing and make it possible for essential reference to be located easily, especially when drawings are presented by several offices. The standard arrangements shall include all relevant informations and sufficient margins shall be left from the edges of finished drawings to facilitate filing and binding whose prints are taken from the original drawings by photographic process, an indication shall be given of this method of reproduction by inserting the word "photographic" below the border line at the bottom right hand corner.

Title Block

The title block is an important feature in a drawing since it facilitates obtaining uniformity and present details like title of drawing, name of organisation or firm, drawing number, scale, date of drawing etc. in a definite manner. The title block shall be placed at bottom right-hand corner of the sheet where it is readily seen when the prints are folded as indicated in Fig. 1.1.

Size of Title Block

The size of the title block shall be 150 × 100 mm for A₁ (840 × 594 mm drawing sheet) size. Typical layout of the title block is illustrated in Fig. 1.2.

Additional Informations

Where appropriate additional informations and notes on the following items may be included to make drawings complete and self contained as far as possible.

Material List

This shall be immediately above the title block and may include such items as schedule of reinforcements, quantity required etc.
