Classifying Graduate Occupations For The Knowledge Society:

Graduate Careers in Context Ciaran Burke, Fiona Christie, 2018-07-11 In a world where there are increasing concerns about graduate underemployment and likely career trajectories it is not surprising that there is a significant body of literature examining graduate careers in post industrial societies However it has become increasingly evident in recent years that there is a stark disconnect between academics who research employment and education and careers and employability professionals Graduate Careers in Context brings these two separate groups together for the first time in order to provide a better understanding of graduate careers The book addresses the problems surrounding the graduate labour market and its relationship to higher education and public policy Drawing on varied perspectives the contributors provide a comprehensive examination of issues such as geography mobility and employability before presenting and discussing the benefits of future collaboration between practitioners and academic researchers The interdisciplinary focus of this book will make it of great interest to academics researchers and postgraduate students in the areas of education sociology social policy business studies and career guidance and coaching It should also be essential reading for practitioners who wish to consider their role and responsibilities within the changing higher education market

Skill Mismatch in Labor Markets Solomon W. Polachek, Konstantinos Tatsiramos, Konstantinos Pouliakas, Giovanni Russo, 2017-05-15 This volume contains original research articles which analyze the linkages between education and skills and the causes and consequences of different types of skill mismatch The volume yields new insights regarding overeducation underskilling graduate jobs wages returns to skills aggregate productivity job complexity and skill development

Internships, Employability and the Search for Decent Work Experience Andrew Stewart, Rosemary Owens, Niall O'Higgins, Anne Hewitt, 2021-06-25 This groundbreaking book examines the growing phenomenon of internships and the policy issues they raise during a time when internships or traineeships have become an important way of transitioning from education into paid work

The Changing Nature of the Graduate Labour Market G. Tholen, 2014-09-23 The assumptions made in the media regarding graduate skills and occupations are no longer valid within the changing educational context This book traces seven key trends that shape the graduate labour market and reveals that their effects contradict the conceptualisation of the graduate labour market which dominates media and policy discourses

Routledge Handbook of the Sociology of Higher Education James E. Côté, 2016-06-03 This is the first handbook to cover the sociological approaches to higher education It is timely because of global expansions of mass higher educational systems especially as these systems come under scrutiny by a variety of stakeholders Questions are being raised about the value of traditional pedagogies along with calls for efficiency accountability and cost reduction but above all job training Within this neoliberal context each chapter examines different sociological aspects of and debates about educational institutions as status conferring organizations with myriad positional characteristics experiences and outcomes Many current debates concern the legitimacy of the statuses conferred including the continuing debate regarding the role of universities in

legitimizing social class reproduction as well as more recent concerns about standards in mass systems This handbook puts these issues and debates in focus in ways that will be of interest to a variety of stakeholders within academia as well as in policy circles
