Colin Renfrew Fondazione internazionale Balzan,2011 **X Marks the Spot** Michael Scott,2023-05-25 What readers are loving about X Marks the Spot Reads like an Indiana Jones novel full of adventure and discovery A cracking good read Fascinating GREG JENNER I couldn't put it down JANINA RAMIREZ Alive with the spirit of adventure RANULPH FIENNES If you love Indiana Jones this is the real thing DAN SNOW Ancient shipwrecks in crystal seas mythical princesses preserved in ice and astonishing lost rituals this is the story of archaeology Professor Michael Scott uncovers the true stories behind history's most monumental discoveries unearthing traps curses and buried treasure along the way Full of extraordinary characters from glory hunters to forgotten heroes X Marks the Spot explores our love affair with the past Premi Balzan ,2007 How Things Shape the Mind Lambros Malafouris,2016-02-12 An account of the different ways in which things have become cognitive extensions of the human body from prehistory to the present An increasingly influential school of thought in cognitive science views the mind as embodied extended and distributed rather than brain bound or all in the head This shift in perspective raises important questions about the relationship between cognition and material culture posing major challenges for philosophy cognitive science archaeology and anthropology In How Things Shape the Mind Lambros Malafouris proposes a cross disciplinary analytical framework for investigating the ways in which things have become cognitive extensions of the human body Using a variety of examples and case studies he considers how those ways might have changed from earliest prehistory to the present Malafouris's Material Engagement Theory definitively adds materiality the world of things artifacts and material signs into the cognitive equation His account not only questions conventional intuitions about the boundaries and location of the human mind but also suggests that we rethink classical archaeological assumptions about human cognitive evolution Eurasia at the Dawn of History Manuel Fernández-Götz,Dirk Krause,2017-01-16 Our current world is characterized by life in cities the existence of social inequalities and increasing individualization When and how did these phenomena arise What was the social and economic background for the development of hierarchies and the first cities The authors of this volume analyze the processes of centralization cultural interaction and social differentiation that led to the development of the first urban centres and early state formations of ancient Eurasia from the Atlantic coasts to China The chronological framework spans a period from the Neolithic to the Late Iron Age with a special focus on the early first millennium BC By adopting an interdisciplinary approach structured around the concepts of identity and materiality this book addresses the appearance of a range of key phenomena that continue to shape our world Invisible Women of Prehistory Marlene Derlet,Judy Foster,2013-06-01 Based on many years of research into ancient history and prehistory this insightful tome argues that three million years of peace a period when women's status in society was much higher than it is now preceded the last 6 000 years of war during which men have come to hold power over women The book challenges the idea accepted in academia that history is a linear development in which society

is steadily moving out of a violent and patriarchal past to a more equitable and peaceful future and it reexamines both the archaeological work of Marjia Gimbutas and recent research into the prehistories of Africa Asia the Americas and Australia and Oceania

The Pottery from Dhaskalio Panagiōta I. Sōtērakopoulou,Colin Renfrew,2016 This volume treats in detail the pottery from the settlement on the islet of Dhaskalio whose excavation is described in Volume I of the series Much of the importance of this material lies in the undisturbed stratigraphy of the settlement a fact that allowed for the recognition of three successive phases of occupation of the site with considerable ceramic continuity between them as well as for safe inferences about its chronology with wider implications for the later early bronze age of the Cyclades Other important aspects of this pottery are its considerable regionalism and the fact that it is almost in its entirety imported The study of the pottery and other finds from the site suggest that the settlement at Dhaskalio may have operated primarily as a place for periodic rather than permanent habitation and that its function was most probably connected with the rituals practised at the opposite Special Deposits at Kavos The character of Deposits at Kavos seem to havw declined and the site may increasingly have grown to be a centre of commercial exchange with other islands and areas
