Structure of Argument 7th Ed + Re:writing Plus Annette T. Rottenberg, Donna Haisty Winchell, 2011-08-05 *Structure of Argument 7th Ed + Videocentral for English* Annette T. Rottenberg, Donna Haisty Winchell, 2011-08-01 *Arguments and Arguing* Thomas A. Hollihan, Kevin T. Baaske, 2015-11-17 The latest edition of *Arguments and Arguing* contains the same balance of theory and practice breadth of coverage current and relevant examples and accessible writing style that made previous editions so popular in hundreds of classrooms The authors draw from classic and recent argumentation theory and research contextualized with well chosen examples to showcase a narrative style of argumentation and the values and attitudes of audiences Readers learn how to employ both formal and informal argumentative strategies in an array of communication forums from interpersonal interactions to academic debate to politics to business A newly added chapter on visual argumentation and a striking color photo insert demonstrate the value and power of visual elements in the construction of arguments The ability to argue is necessary if people are to solve problems resolve conflicts and evaluate alternative courses of action While many are taught that arguing is counterproductive and arguments should be avoided Hollihan and Baaske illustrate that arguing is an essential and fundamental human activity Learning the art of effective argumentation entails a grasp of not only the strategies and principles of analysis and logical reasoning but also the importance of arguing in a positive and socially constructive fashion *Elements of Argument* Annette T. Rottenberg, Donna Haisty Winchell, 2011-08-03 *Elements of Argument* combines a thorough argument text on critical thinking reading writing and research with an extensive reader on both current and timeless controversial issues It presents everything students need to analyze research and write arguments *Elements of Argument* covers Toulmin Aristotelian and Rogerian models of argument and has been thoroughly updated with current selections students will want to read It now includes additional support for academic writing making it a truly flexible classroom resource An electronic edition is available at half the price of the print book Read the preface *Television Sitcom and Cultural Crisis* Holly Willson Holladay, Chandler L. Classen, 2024-06-21 This volume demonstrates that television comedies are conduits through which we might resist normative ways of thinking about cultural crises By drawing on Gramscian notion of crisis and the understanding that crises are overlapping interconnected and mutually constitutive the essays in this collection demonstrate that situation comedies do more than make us laugh they also help us understand the complexities of our social world s moments of crisis Each chapter takes up the televisual representation of a modern cultural crisis in a contemporary sitcom and is grounded in the extensive body of literature that suggests that levity is a powerful mechanism to make sense of and cope with these difficult cultural experiences Divided into thematic sections that highlight crises of institutions and systems identity and representation and speculation and futurism this book will interest scholars of media and cultural studies political economy communication studies and humor studies **Argument Dialectics: The Place of Reasons in Logic** Hubert Marraud, 2025-06-12 This

book is a systematic exposition of Argument Dialectics AD Despite its name argument dialectics is a logical approach to argumentation theory AD stands out among theories of argument because of three unusual features it is reasons based holistic and particularistic This implies that AD conceives of logic as a theory of the dialectical construction of reasons not as a theory of inferences Consequently contrary to other logical approaches AD focuses on the study of inter argumentative relations especially those of opposition and weighing The book makes an extensive use of the theory of reasons a branch of metaethics that has been a very valuable quarry of intuitions and concepts for the elaboration of a reason based theory of argument The oppositions generalism particularism and atomism holism proposed by Jonathan Dancy which play a central role in the book and in the development of AD have been adapted from the theory of reasons and the same can be said of the distinction between different statuses of reasons that AD associates with different kinds of counterarguments Conceiving of the theory of argument in terms of reasons has the effect of situating the paradigm of argumentation in practical argumentation reasoning about what to do rather than in theoretical argumentation about what to believe as inference based theories do Hence this book is of interest to argumentation theorists communication theorists epistemologists linguists moral philosophers and philosophers of law

Freeman,2025-03-25 This book presents a comprehensive picture of when the premises of an argument are adequately connected to its conclusion The author draws upon the familiar Toulmin model Rescher s discussion of presumption and

burden of proof and L Jonathan Cohen s presentation of the method of relevant variables The book first assesses the warrant or inference rule connecting the premises to the conclusion To analyzes this the author asks a series of questions such as should the warrant be evaluated by conclusive or defeasible standards Does the argument require that its premises if acceptable guarantee that the conclusion is acceptable also or does it allow the premises just to present a body of relevant evidence Is the inference rule backed or supported a priori or a posteriori These distinctions form four categories of warrants conclusive a priori defeasible a posteriori defeasible a priori and virtually conclusive a posteriori The warrants in each category are evaluated differently for how strongly the premises support the conclusion of arguments instancing those warrants After presenting the rationale for this division and discussing our nonprobabilistic approach the author analyzes the connection adequacy for each of these types of warrants This book is of interest to scholars of argumentation theory
