Shakespeare's Ecology of Natural Resources Sophie Chiari, 2025-11-13 Sophie Chiari analyzes how Shakespeare s plays and poems present the transformation of the early modern natural world through environmental shifts and new ecological issues Using a range of examples from the Sonnets Love s Labour s Lost Hamlet Timon of Athens and The Tempest Chiari s ecopoetic study of dramatic language explores Shakespeare s response to the rise of extractive exploitation in Elizabethan and Jacobean England Chiari expands our understanding of the environment in Shakespeare beyond the so called green comedies by charting the transition from a pre capitalist world towards a commodity based society characterized by the enclosure of the commons and the rise of imperialism This study uses examples of materials which are recurrently underrepresented in Shakespearean ecocriticism including water systems sandscapes and soil alongside the production of glass and salt in Shakespeare signalling a commitment to expanding the material turn in Shakespeare studies Far from being limited to a presentist reading this book argues that cultural hegemony and the exploitation of soil ore and water were increasingly linked in the early modern era an age of conquest and massive human depredation By articulating ecohistoricism with ecopoetics and material studies Shakespeare s Ecology of Natural Resources shows how an eco minded approach focused on the interweaving of trade territory and extractivism reveals new layers of meaning in Shakespearean poetics and drama
