perform all the computations required by the Avionics systems including the first GPS installed on a military aircraft A second reason I wanted to write this book is that I learned that the Dreamliner has some of the features first used on the F111 for which I designed the Guidance and Control This book includes a description of the similar features used by the Dreamliner I realize that the advent of Nanotechnology used in the Dreamliner electronics makes it quite different than the electronics of the F111 time period For example GPS navigation is included as a function on handheld smartphones in the nanotechnology era rather a PC computer sized box used on the F111 Another important factor is cost nanotechnology electronics are muelctronics **Aviation Business Magazine** ,2009-02 Avionics Cary R.
