**Handbook of Computability and Complexity in Analysis** Vasco Brattka,Peter Hertling,2021-06-04 Computable analysis is the modern theory of computability and complexity in analysis that arose out of Turing s seminal work in the 1930s This was motivated by questions such as which real numbers and real number functions are computable and which mathematical tasks in analysis can be solved by algorithmic means Nowadays this theory has many different facets that embrace topics from computability theory algorithmic randomness computational complexity dynamical systems fractals and analog computers up to logic descriptive set theory constructivism and reverse mathematics In recent decades computable analysis has invaded many branches of analysis and researchers have studied computability and complexity questions arising from real and complex analysis functional analysis and the theory of differential equations up to geometric measure theory and topology This handbook represents the first coherent cross section through most active research topics on the more theoretical side of the field It contains 11 chapters grouped into parts on computability in analysis complexity dynamics and randomness and constructivity logic and descriptive complexity All chapters are written by leading experts working at the cutting edge of the respective topic Researchers and graduate students in the areas of theoretical computer science and mathematical logic will find systematic introductions into many branches of computable analysis and a wealth of information and references that will help them to navigate the modern research literature in this field

**Molecular Theory of Water and Aqueous Solutions** Arieh Ben-Naim, 2009 The aim of this book is to explain the unusual properties of both pure liquid water and simple aqueous solutions in terms of the properties of single molecules and interactions among small numbers of water molecules It is mostly the result of the author's own research spanning over 40 years in the field of aqueous solutions An understanding of the properties of liquid water is a prelude to the understanding of the role of water in biological systems and for the evolution of life The book is targeted at anyone who is interested in the outstanding properties of water and its role in biological systems It is addressed to both students and researchers in chemistry physics and biology

**Mathematical Modelling** Simon Serovajsky, 2021-11-23 Mathematical Modelling sets out the general principles of mathematical modelling as a means comprehending the world Within the book the problems of physics engineering chemistry biology medicine economics ecology sociology psychology political science etc are all considered through this uniform lens The author describes different classes of models including lumped and distributed parameter systems deterministic and stochastic models continuous and discrete models static and dynamical systems and more From a mathematical point of view the considered models can be understood as equations and systems of equations of different nature and variational principles In addition to this mathematical features of mathematical models applied control and optimization problems based on mathematical models and identification of mathematical models are also presented Features Each chapter includes four levels a lecture main chapter material an appendix additional information notes explanations technical calculations literature review and tasks for independent work this is suitable for undergraduates and graduate students and does not require the reader to take any prerequisite course but may be useful for researchers as well Described mathematical models are grouped both by areas of application and by the types of obtained mathematical problems which contributes to both the breadth of coverage of the material and the depth of its understanding Can be used as the main textbook on a mathematical modelling course and is also recommended for special courses on mathematical models for physics chemistry biology economics etc
