Abstract - Now a days the work is being done by hiring the space and resources from the cloud providers in order to do work effectively and less costly. This paper describes the cloud, its challenges, evolution, attacks along with the approaches required to handle data on cloud. The practice of using a network of remote servers hosted on the Internet to store, manage, and process data, rather than a local server or a personal computer. The need of this review paper is to provide the awareness of the current emerging technology which saves the cost of users.

Keywords— cloud; SAAS; providers; SOA; resources.

I. INTRODUCTION

The term “cloud” deals with the group of system which exchanges the data from one system to another by providing resources over the internet. The resources existing in cloud can be used enormously by user whenever they need it. In cloud computing, physical infrastructure is usually desired to third party provider for service of internet instead of setting up their own resources by the customers. Customers use the resources as a service and pay only for the used quantity of resources. Cloud providers use self-service abilities and virtualization technologies for allocating resources via network infrastructure. In cloud environment, many kinds of virtual machines are put on the same physical server for communications. In cloud, customers are paid for what they used and are not paid for storage or infrastructure considered as local resources.

II. LITERATURE SURVEY

“Evolution of Cloud Computing, its Approaches and Comparison with Grid Computing” Rajleen Kaur, Amanpreet Kaur. In this review paper they have discussed about the cloud computing characteristics and its evolution. As in this the cloud computing and its approaches are studied, the cloud computing will increase in today’s scenario. So, the cloud computing have a great impact on society. Review paper on Cloud Computing, Seema Sharma, Jyoti Godara. In this paper

they discuss about various deployment model and cloud services of cloud computing. Cloud computing is recent buzzword in IT world. The Leader in the companies, such as Microsoft, Amazon, IBM, and Google provided their initiative in promoting cloud computing. But still there are some issues in the cloud computing like testing issues, security issues, and privacy issues.

Research Agenda in Cloud Technologies, Ilango Sriram, Ali Khajeh-Hosseini. This paper has presented the work published by the academic community advancing the technology of cloud computing. Much of the work has focused on creating standards and allowing interoperability, and describes ways of designing and building clouds.

III. KINDS OF CLOUD COMPUTING

A. Public Cloud

Standard models providers to create many resources such as applications and storage, which are available to the public. Public cloud services are either free or not. Public clouds which are running applications outwardly by large service providers, provides some benefits over private clouds.

B. Private Cloud

It identifies to internal services of a business that is not accessible for regular people. Private cloud is a promoting term for a structural design that provides hosted services abait the firewall to the people.

C. Hybrid Cloud

A domain that company offers and controls some resources internally and has some others for public consumption. It is a group of private and public clouds. Cloud provider, has a service that uses private cloud and is only authorized by certified staff and is protected by firewalls from outside accessing. Also using a public cloud environment in which external users can access to it. In cloud computing, the capacity is lifted so that workload can be reduced. For successively working applications, the local computers do not to take the heavy load. Actually this burden is handled by group of computer which forms the cloud. On Customer side the demand of hardware and software reduces. So, the thing
