Organized by protein chapters, also covers cereals and legumes, oilseeds, pseudocereals, fungi, algae, insects, and fermentation-derived dairy and meat proteins, paying particular attention to the nutrition, uses, functions, benefits, and challenges of each. The book also explores ways to improve utilization and addresses everything from consumer acceptability, methods of improving the taste of products containing these proteins, and ways in which policies can affect the use of alternate proteins. In addition, the book addresses sustainable protein as a pathway to securing the food supply and considers regenerative versus extractive agriculture alongside new methods in farming and water usage.
