Voet, 2010-07-28 Taylor & Francis Group, 2010-12-31 *Fundamentals of Sustainable Chemical Science* Stanley E. Manahan, 2009-03-10. Written by Stanley Manahan. *Fundamentals of Sustainable Chemical Science* has been carefully designed to provide a basic introduction to chemistry including organic chemistry and biochemistry for readers with little or no prior background in the subject. Manahan, bestselling author of many environmental texts, presents the material in a practical Cellular and Biochemical Science. G. Tripathi, 2010-03. The fundamental aim underlying Cellular and Biochemical Sciences is to emphasize diversified topics of current interest to postgraduate students pursuing different courses in the area of biological sciences including Zoology, Botany, Biochemistry, and Biotechnology. The text is also relevant to the students of Life Sciences, Biosciences, Cell Biology, Bioengineering, and Pharmacology. A total of 58 topics have been incorporated in the book, and some of the topics are rarely found in other books of Biology. New information has been introduced which updates existing knowledge and enables the book to justify its claim as the most comprehensive text in the sphere of cellular and biochemical sciences at the postgraduate and competitive examination levels. Each and every chapter has been designed in lucid and readable manner. There are references, suggested readings, long questions, and objective questions at the end of chapters for revision of topics.

Physical Chemistry for the Biosciences Raymond Chang, 2005-02-11. This book is ideal for use in a one semester introductory course in physical chemistry for students of life sciences. The author's aim is to emphasize the understanding of physical concepts rather than focus on precise mathematical development or on actual experimental details. Subsequently, only basic skills of differential and integral calculus are required for understanding the equations. The end of chapter problems have both physiochemical and biological applications.
