Boeing Freighter Reference Guide:

DICTIONARY OF INTERNATIONAL TRADE 8th Edition , **Moving Boxes by Air** Peter S. Morrell, Thomas Klein, 2018-10-08 Air cargo is a key element of the global supply chain It allows outsourcing of manufacturing to other countries and links production in both multinational and smaller enterprises It has also been the most important driver of certain export industries in countries such as South Africa Kenya and Chile As a component of the air transport industry air cargo makes the crucial difference between profit and loss on many long haul routes This second edition of Moving Boxes by Air offers a comprehensive and up to date guide to the business and practices of air cargo with chapters dedicated to key issues such as current trends market characteristics regulation airport terminal operations pricing and revenues and environmental impacts The book illustrates the recent emphasis on mergers at the expense of alliances which have not had the impact that they had on passenger operations The section on security has been expanded to assess in more depth the threats to aircraft from terrorists particularly in the lower cargo and passenger baggage compartments Surcharges are examined and the book considers whether all airlines will follow the lead of some to do away with both fuel and security surcharges The book concludes with a summary of the latest industry forecasts Fully updated throughout this edition is the definitive guide to air cargo for professionals within both the aviation and freight industries

Dictionary of International Trade Edward G. Hinkelman, 2005 The Dictionary of International Trade has undergone a major update and expansion With many pages of additional content the book is now one third dictionary and two thirds encyclopedia In addition to the revised A Z section there are 21 important appendices New features include Illustrated Guide to Ocean Freight Containers Illustrated Guide to Air Freight Containers Illustrated Guide to Incoterms 2000 Illustrated Guide to Letters of Credit IATA Codes Worldwide by Code and by Location Security Section covering C TPAT FAST PAPS PARS 24 Hour Rule and more

Evaluation of the Role and Needs of Air Cargo in Texas Benjamin R. Sperry, Jeffery E. Warner, Jeffrey D. Borowiec, 2008 According to the U S Department of Transportation the cargo industry continues to grow with air cargo identified as the fastest growing segment within the cargo industry The value of freight moved by air has doubled since 1993 and currently exceeds 2 7 billion per day During that same period the typical freight shipment distance increased 40 percent partly due to the distances of the air cargo movements Because most air cargo shipments begin and end using trucks growth in this segment will undoubtedly create additional growth in truck movements in and around the airport environment It has been more than 30 years since the state has made a comprehensive review of the air cargo business within its borders In that time much has changed in Texas in the United States and across the globe The industry has changed through consolidation and mergers with ground transportation companies in the services they provide and in the current level of technology employed The world is a different place our economies have been transformed and the nature of doing business has altogether changed So far the impact of growth in air cargo on the Texas transportation system has gained little attention

when compared to issues related to seaport traffic The research objective for this project is to better understand the operations of the air cargo industry in Texas in order to better accommodate the industry s needs provide for a more efficient transportation network better utilize general aviation facilities and provide for economic development across the state This research identifies the existing demand for air cargo movement in Texas the ground facilities available to process this demand and a network that would be efficient and responsive to the needs of industry stakeholders It also identifies the state s network of existing air cargo facilities both those handling existing air cargo activity and those capable of handling air cargo in the future
