More Than Human:

More-Than-Human Literacies in Early Childhood Abigail Hackett,2021-03-25 *More Than Human Literacies in Early Childhood* draws on a long term ethnographic research into the role of place materiality and the body in the literacies of young children aged 12-36 months. It builds a picture of how children participate in or become caught up in literacies and language in the contexts of their everyday lives. Throughout the book, recognised understandings of young children are decentred in favour of experiential knowing of parents and communities, body, place, knowing and ordinary affects. Abigail Hackett argues that young children's literacies are always more than human, involving sounds, gestures and movements between humans and nonhuman places and things. By paying close attention to the more than human nature of these literacies, which rely on bodies, places, animals, humans, objects and atmospheres, a case is made for the decentring of young children. The book will be of particular interest to researchers looking at feminist new materialism, posthumanism, affect theory and critical literacy in early childhood settings. *New Materialisms and Environmental Education* David A. G. Clarke, Jamie McPhie,2023-07-24 *New materialisms* refers to a broad contemporary and significant movement of thought across the social sciences and cultural studies which attempts to return to renew or create alternative philosophies of matter. Such philosophies spring from multiple sources but are in general an attempt to bring the indissolubility of the social and environmental more forcefully into our analytical frames and modes of inquiry and tackle a perceived over-reliance on discourse and language in the so-called post-modern era of philosophy and social science. This movement in thought is underlaid by and meets up with the climate and biodiversity crises and the nature of the human condition and modes of learning or becoming within the field of environmental education. This volume brings together academics working at differing intersections of environmental education and new materialisms, highlighting tensions, knots and lines of flight across and for research practice and theory. As such, this collection draws on multiple interpretations and streams of thought within new materialisms and demonstrates their significance for those engaging with environmental education policy practice and research. This book was originally published as a special issue of the journal *Environmental Education Research*. *Research Handbook on Artificial Intelligence and Communication* Seungahn Nah,2023-11-03 This forward-looking *Research Handbook* makes an insightful contribution to the emerging field of studies on communication of and with AI. Bringing together state-of-the-art research from over 50 leading international scholars across various fields, it provides a comprehensive overview of the complex intersections between AI and communication. **More Than Human** Theodore Sturgeon,1975 From one of the greatest practitioners of science fiction comes a genre-bending novel that is as affectingly humane as it is speculatively daring.
