**Control Criteria and Materials Performance Studies for Cathodic Protection of Reinforced Concrete** John J. Bartholomew, 1993 This work investigated the feasibility of improved and simplified control criteria for cathodic protection of concrete structures Corrosion rates of steel were established in a simulated concrete environment as a function of chloride contamination pH temperature and cathodic protection current mathematical models were developed to establish concentration profiles which develop as a result of cathodic protection current and to study current distributions which result from geometric factors These studies are combined to develop improved and simplified current based control criteria Long term effects of cathodic protection current on concrete and aggregate near the steel and the anode were also investigated

*Materials Protection and Performance*, 1964      *Certification and Accreditation Programs Directory* Michael A.

Paré, 1996 Providing detailed profiles on certification and accreditation programmes in the US this book includes information on certification and accreditation programmes that denote skill level professionalism accomplishment and excellence

**Corrosion Abstracts**, 1963      *Corrosion Science and Engineering* Pietro Pedferri, 2018-09-21 This textbook discusses the latest advances in the corrosion of metals and related protection methods and explores all corrosion related aspects used in natural and industrial environments including monitoring and testing Throughout the textbook the science and engineering of corrosion are merged to help readers perform correct corrosion assessments in both the design phase and plant management phase and to define the optimal protection technique In addition the book addresses basic aspects of corrosion science including the electrochemical mechanism thermodynamic and kinetic aspects the use of Pourbaix and Evans diagrams and various forms of corrosion from uniform to localised to stress corrosion phenomena as well as the protection systems adopted to combat corrosion including inhibitors coatings and cathodic protection Such basic knowledge is fundamental to understanding the corrosion engineering approach applied to the durability of metals immersed in water buried in soil exposed to the atmosphere used in reinforced concrete in the human body and in petrochemical plants or at risk of high temperature corrosion A final chapter is dedicated to the use of statistics in corrosion All chapters include exercises and practical examples to help students understand predict evaluate and mitigate corrosion problems As such the book offers the ideal learning resource for all students of corrosion courses in chemical mechanical energy and materials engineering at the graduate and advanced undergraduate level as well as a valuable reference guide for engineers whose work involves real world applications      *Operating Section Proceedings* American Gas Association.
