Cultural Influences on Architecture Koç, Gülşah, Claes, Marie-Therese, Christiansen, Bryan, 2016-10-19 A society's culture is a contributing factor to the structure and design of its architecture. As contemporary globalism brings about the evolution of the world architectural style, it evolves along with it, which can be observed on an international scale. *Cultural Influences on Architecture* is a pivotal reference source for the latest research on the impact of culture on architecture through the aspects of planning and production and highlights the importance of communicative dimension in design. Featuring exhaustive coverage on a variety of relevant perspectives and topics such as the evolution of construction systems, benefits of nature-based architecture, and fundamentals of social capital, this publication is ideally designed for researchers, scholars, and students seeking current research on the connection between culture and architecture on a global level.

The Architect's Sourcebook Stanislas Chaillou, 2024-06-17 The Architect's Sourcebook provides readers with an accessible and playful space planning manual for the digital age. Architects' Data Ernst Neufert, Peter Neufert, 2012-03-26 Neufert's *Architects' Data* is an essential reference for the initial design and planning of a building project. It provides in one concise volume the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations and with over 6200 diagrams, it provides a mass of data on spatial requirements. Most illustrations are dimensioned, and each building type includes plans, sections, site layouts, and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition and represents a major new edition for an international English-speaking readership. Reviews of the Previous Edition: Neufert's *Architects' Data* was the first book I bought when I started my studies in architecture. It was invaluable for me then, and it is still a useful aid in my designs. Cesar Pelli: With this thorough rewrite, Neufert has produced yet again an invaluable reference book. **The Architect in Practice** David

Chappell, Andrew Willis, 2010-07-13 *The Architect in Practice* was first published in 1952. Originally written by a quantity surveyor and an architect, it has remained through its nine editions a leading textbook used in the education of architects world wide. While the format of the book has developed, the message and philosophy remains the same as the original to provide the student of architecture and the young practitioner with a readable guide to the profession, outlining an architect's duties to client and contractor, the key aspects of running a building contract, and the essentials of management, finance, and drawing office procedure. The tenth edition follows in that tradition. The authors, still an architect and a quantity surveyor, have brought the text fully up to date. Major revisions in this edition include Revised sections on Planning and the Building Regulations. Changes to the education of architects in the UK have been detailed. Discussion of the new ARB Architects Code, Standards of Professional Conduct and Practice, which came into force in January 2010. The commentary on the RIBA Standard Form for the Appointment of an Architect 1999 SFA 99 has been updated. The latest RIBA Standard Agreement 2010 S 10 A is now discussed. All references to JCT contracts have been updated to refer to the latest revisions of the 2005 suite of contracts. Now also includes reference to education, registration, and CPD requirements of the Royal Institute of the Architects of Ireland. The tenth edition of *The Architect in Practice* will continue to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession. Use Matters Kenny Cupers, 2013-10-15 From participatory architecture to interaction design, the question of how design accommodates use is driving inquiry in many creative fields. Expanding utility to embrace people's everyday experience brings new promises for the social role of design. But this is nothing new. As the essays assembled in this collection show, interest in the elusive realm of the user was an essential part of architecture and design throughout the twentieth century. *Use Matters* is the first to assemble this alternative history from the bathroom to the city, from ergonomics to cybernetics, and from Algeria to East Germany. It argues that the user is not a universal but a historically constructed category of twentieth century modernity that continues to inform architectural practice and thinking in often unacknowledged ways. *A System for the Description and Classification of Movement Behaviour* Marianne Englund, 1975 *Design-Tech* Thomas Leslie, Rob Whitehead, 2014-03-21 *Design Tech* is an indispensable holistic approach to architectural technology that shows you, in hundreds of drawings and tables, the why as well as the how of building science, providing you with a comprehensive overview. In this expanded edition, measurements and examples are listed in both metric and imperial units to reflect the global reality of architectural practice. The authors also address digital fabrication, construction documentation, ultra high rise structures, and zoning codes. And there's more in depth coverage of structural design and greater emphasis on environmental forces. Numerous case studies demonstrate real world design implications for each topic, so that you can integrate technical material with design sensibilities. Short chapters explain each topic from first principles in easy to reference formats, focusing on what you need to know both at the drawing board and in future discussions with engineers, contractors, and consultants. This new edition

incorporates material from continuing curricular experimentation in the SCI TECH sequence at Iowa State University which has been recognized with awards and funding from the American Institute of Architects the U S Green Building Council and the National Council of Architectural Registration Boards **Document** ,1975 *Architects' Data* Ernst Neufert,1970
