Metacognitive activities include teaching readers how to evaluate their own learning styles to increase their ability to read college level material successfully. Exercises that ask readers to respond by writing sentences and paragraphs after reading help make the critical connection between these two activities. Numerous diagrams and drawings help readers visualize how reading material can be organized. High interest photographs and artwork appeal to the visual learner. Chapter ending readings give immediate practice for chapter skills and aid in transferring these skills to actual reading situations. Learning Style Tips reinforce material introduced earlier throughout the book and teach readers how to apply knowledge of their individual learning styles to learn new skills.
