

# TRAIT THEORY OF PERSONALITY

The trait theory of personality suggests that individuals possess consistent patterns of behavior, emotions, and thoughts that can be categorized into specific traits.

## OVERVIEW

Trait theorists believe that personalities consist of consistent and relatively stable traits. Based on this premise, personality can be understood by identifying and measuring traits using standardized assessment tools. Traits are considered to be relatively independent of each other, meaning that individuals can possess varying degrees of different traits simultaneously.

## CHARACTERISTICS

Traits are characterized by:

- **Consistency:** Traits are consistent over various situations.
- **Stability:** Traits are stable over long periods of time.
- **Individual Differences:** Different individuals have different traits, such as extraversion and introversion.

## Concepts Of Personality:

**Concepts of Personality** Joseph M. Wepman, Ralph W. Heine, 2008-09-01 The psychologist who pursues an interest in personality is constantly faced by a dilemma He seeks to investigate what is to him the most intriguing and interesting subject the multifaceted operations of man in his natural environment The predicament lies in the discrepancy between the complexity and richness of man s subjective experience and the pallid analog of these experiences the psychologist is able to study effectively with the research procedures available to him In *Concepts of Personality* Joseph M Wepman and Ralph W Heine offer a comprehensive survey of classical and contemporary personality theory including a wide array of examples of these two trends If the psychologist holds to the premises of strict objectivity through controlled observations he finds himself driven to the periphery of the very problem he seeks to understand This is a place where the reliability of measurement and the validity and predictability of his instruments can often be specified but only at the cost of abandoning the goal of useful generality or of application to the individual in his ordinary life circumstances *Concepts of Personality* unlike most books on the subject is not limited to broad general theories It includes chapters on basic processes learning perception genetics and drive theory on the major analytical approaches of psychology and psychiatry on anthropological and sociological contributions and on the problems of measurement and assessment Each chapter is by an authority on the point of view expressed The editors introduction itself a major essay on the complex and divergent patterns and themes of contemporary views of personality carefully leads the reader through the information at hand The book as a whole constitutes an encyclopedic summary of the state of the science Joseph M Wepman was professor of psychology and surgery and chairman of the Interdepartmental Clinical and Counseling Psychology Training Program of the University of Chicago He is the author of *Recovering from Aphasia and Aphasia and the Family* Ralph W Heine was professor of psychiatry and psychology and chief clinical psychologist in the department of psychiatry at the University of Chicago He is the author of *The Student Physician as Psychotherapist and Psychotherapy* *Interaction Concepts of Personality* Robert C. Carson, 2019-03-04 Personality is an intimidatingly complex area of human behaviour where empirically valid generalizations are not easily established or formulated and where investigators at the time of publication were themselves a long way from the development of a commonly shared language and conceptual system Originally published in 1969 Dr Carson s book provided for the first time an empirically grounded systematic framework to analyse describe and to some extent explain the transactions that occur between people from a standpoint of a personologist The author starts from a Sullivanian base which views personality as a largely interpersonal phenomenon He then reformulates Sullivanian conceptions into a more complete framework one more firmly tied to observable events or empirically testable hypotheses This work represents a unique effort to integrate from available empirical findings and conceptual formulations within psychology and the social sciences a comprehensive account of socially significant personal conduct It brings together within an integrating framework diverse
