Lucian Boia Humanitas:

Intercultural Conflict and Harmony in the Central European Borderlands Mihai I. Spariosu, 2017-05-15 This crossdisciplinary collection of essays combines qualitative and quantitative approaches to re-examine the most influential contemporary theories of intercultural relations and their application in various domains including historiography, sociology, and cultural studies. A particular focus lies on Central Europe, historical Banat and Transylvania, but also on the current public policies toward ethnic and religious minorities as well as recent immigrants. It argues that much more complex approaches are needed both historically and conceptually in exploring intercultural relations. Thus, the political decision-making in East-Central European countries and the European Union as a whole could benefit from a well-informed historical perspective by learning from the successes and errors of their predecessors.

The Political Anthropology of Ethnic and Religious Minorities Arpad Szokolczai, Agnes Horvath, Attila Z. Papp, 2018-12-07 This book presents some arguments for why a political anthropological perspective can be particularly helpful for understanding the connected political and cultural challenges and opportunities posed by the situation of ethnic and religious minorities. The first chapter shortly introduces the major anthropological concepts used, including liminality, trickster, imitation, and schismogenesis, concepts that are used together with approaches of historical sociology and genealogy, especially concerning the rise and fall of empires and their lasting impact. The conceptual framework suggested here is particularly helpful for understanding how marginal places can become liminal, appearing suddenly at the center of political attention. The introduction also shows the manner in which minority existence can problematize the depersonalizing tendencies of modern globalization. Subsequent chapters demonstrate how the described political anthropological conceptual framework can be used in certain European regions and in the case of certain ethnic and religious minorities, and each illustrates that instead of charismatic leaders, trickster politicians are emerging and increasingly dominating through the public sphere, the space of modern politics emptied of real presence. The chapters in this book were originally published as a special issue of *Nationalism and Ethnic Politics*.

Capitalism in Chaos Máté Rigó, 2022-08-15 *Capitalism in Chaos* explores an often overlooked consequence and paradox of the First World War: the prosperity of business elites and bankers in service of the war effort during the destruction of capital and wealth by belligerent armies. This study of business life amid war and massive geopolitical changes follows industrialists and policymakers in Central Europe as the region became crucially important for German and subsequently French plans of economic and geopolitical expansion in the late nineteenth and early twentieth centuries. Based on extensive research in sixteen archives, five languages, and four states, Máté Rigó demonstrates that wartime destruction and the birth of war millionaires were two sides of the same coin. Despite the recent centenaries of the Great War and the Versailles peace treaties, knowledge of the overall impact of war and border changes on business life remains sporadic, based on scant statistics and misleading national foci. Consequently, most histories remain wedded to the viewpoint of national governments.

and commercial connections across national borders Capitalism in Chaos changes the static historical perspective by presenting Europe's East as the economic engine of the continent Rig accomplishes this paradigm shift by focusing on both supranational regions including East Central and Western Europe as well as the eastern and western peripheries of Central Europe Alsace Lorraine and Transylvania from the 1870s until the 1920s As a result Capitalism in Chaos offers a concrete lively history of economics during major world crises with a contemporary consciousness toward inequality and disparity during a time of collapse

Power and Literature Florin Oprescu, 2018-08-21 At the core of this book lies the relation between Power as socio political phenomenon and the novel as literary discourse It shows that in a society facing the excess of power in its various forms novelistic fiction mediates knowledge about societal Power structures and uses specific strategies to subvert and denounce them The first part of the study is theoretical it presents some of the most prominent theories of Power from Plato

Machiavelli Nietzsche to Weber Dahl Lukes Parsons Bourdieu or Foucault After offering a critical approach to the concepts of Power defined in the social political and philosophical fields it articulates the relations of Power imprinted in literary discourse within a typology of four categories In the second part of the book this taxonomy of Power is applied to four key novels in the context of Romanian literary crossroads showing how novelistic fiction not only assume a critical and subversive position against the excess of Power but also unveils our fragility when experiencing History
