Aristotle for Everybody Mortimer J. Adler, 1997-06-01 Adler instructs the world in the uncommon common sense of Aristotelian logic presenting Aristotle's understandings in a current delightfully lucid way Aristotle 384-322 B.C. taught logic to Alexander the Great and by virtue of his philosophical works to every philosopher since from Marcus Aurelius to Thomas Aquinas to Mortimer J. Adler Now Adler instructs the world in the uncommon common sense of Aristotelian logic presenting Aristotle's understandings in a current delightfully lucid way He brings Aristotle's work to an everyday level By encouraging readers to think philosophically Adler offers us a unique path to personal insights and understanding of intangibles such as the difference between wants and needs the proper way to pursue happiness and the right plan for a good life *The Freedom of Peaceful Action* Stuart K. Hayashi, 2014-04-23 *The Freedom of Peaceful Action* is the first installment of the trilogy *The Nature of Liberty* which makes an ethical philosophic case for individual liberty and the free market against calls for greater government regulation and control The trilogy makes a purely secular and nonreligious ethical case for the individual's rights to life liberty private property and the pursuit of happiness as championed by the U.S. Founding Fathers Inspired by such philosophic defenders of free enterprise as John Locke Herbert Spencer and Ayn Rand *The Nature of Liberty* shows that such individual rights are not imaginary or simply assertions but are institutions of great practical value making prosperity and happiness possible to the degree that society recognizes them The trilogy demonstrates the beneficence of the individual rights approach by citing important findings in the emerging science of evolutionary psychology Although the conclusions of evolutionary psychology have been long considered to be at odds with the philosophies of individual liberty and free markets *The Nature of Liberty* presents a reconciliation that reveals their ultimate compatibility as various important findings of evolutionary psychology being logically applied confirm much of what philosophic defenders of liberty have been saying for centuries Moreover proceeding from the viewpoint of Rand this work argues that the structure of society most conducive to practical human well-being is commensurately the most moral and humane approach as well The trilogy's first installment *The Freedom of Peaceful Action* focuses on the secular philosophic foundation for a society based on individual rights Starting from a defense of the efficacy of observational reason against criticisms from Immanuel Kant and Karl Popper it demonstrates how a philosophic position of individual liberty and free markets is the logical result of the consistent application of human reason to observing human nature This installment demonstrates that any political system that wishes for its citizens to thrive must take human nature into account and that an accounting of human nature reveals that a system of maximum liberty and property protection is the one most conducive to peace and human well-being [A Faithful Guide to Philosophy](#) Peter S. Williams, 2019-02-14 [A Faithful Guide to Philosophy](#) is the only British Christian introduction to philosophy a book that will be used as a course textbook and by church study groups and individual readers alike It covers a broad range of subjects of central importance to the Christian worldview and will be prized by many

Neo-Classical Physics or Quantum Mechanics? Dilip D James,2016-10-27 There is an uncanny resemblance between Christianity in the middle ages and Physics in the twenty first century Formerly the common man could neither read nor understand the scriptures as they were written in Latin the clergy had to interpret the scriptures for the laity with predictable results Physics in the twenty first century is similar Only mathematicians with doctoral degree can understand the universe and how it works to the rest of mankind the universe is an area of darkness This is not by any means a desirable development As human beings we are all sentient individuals and as such are expected to enquire about our environment the world around us and the universe we live in On a fundamental philosophical basis it is wrong to believe that such knowledge whether by circumstance or by design is limited to a privileged few This book explains the universe for the first time in a way that is comprehensible to everyone Neo classical physics undertakes the study of the behaviour of the universe as an entity and the physics of sub atomic particles is easy to understand in everyday terms Neo classical physics is the language that sets you free free to see free to comprehend and free to wonder anew
