NEURAL NETWORKS THROUGH EXAMPLES* CESAR PEREZ LOPEZ, MATLAB includes the Deep Learning Toolbox which provides algorithms functions and applications for creating training visualizing and simulating neural networks It allows for classification regression clustering dimensionality reduction time series prediction and modeling and control of dynamic systems Dynamic neural networks are

especially useful for time series prediction You can use the Neural Net Time Series application to solve various time series problems It is generally recommended to start with the graphical user interface GUI and then use it to automatically generate command line scripts This book uses the Deep Learning Toolbox graphical interface to delve deeper into working with neural networks for function fitting pattern classification cluster analysis time series modeling and parallel and distributed computing Common network architectures are used such as the multilayer perceptron the radial basis network adaline networks self organizing maps and the Kohonen network

MATLAB Machine Learning Michael Paluszek, Stephanie Thomas, 2016-12-28 This book is a comprehensive guide to machine learning with worked examples in MATLAB It starts with an overview of the history of Artificial Intelligence and automatic control and how the field of machine learning grew from these It provides descriptions of all major areas in machine learning The book reviews commercially available packages for machine learning and shows how they fit into the field The book then shows how MATLAB can be used to solve machine learning problems and how MATLAB graphics can enhance the programmer s understanding of the results and help users of their software grasp the results Machine Learning can be very mathematical The mathematics for each area is introduced in a clear and concise form so that even casual readers can understand the math Readers from all areas of engineering will see connections to what they know and will learn new technology The book then provides complete solutions in MATLAB for several important problems in machine learning including face identification autonomous driving and data classification Full source code is provided for all of the examples and applications in the book What you ll learn An overview of the field of machine learning Commercial and open source packages in MATLAB How to use MATLAB for programming and building machine learning applications MATLAB graphics for machine learning Practical real world examples in MATLAB for major applications of machine learning in big data Who is this book for The primary audiences are engineers and engineering students wanting a comprehensive and practical introduction to machine learning
