being trained and validated the best state of the network was pointed out and tested on the testing dataset and some real images The result showed that the LeNet was able to classify images of documents in a pretty high accuracy At the end of the project I modified the network and discussed the affect that those changes had on the network with the purpose of creating another similar network which can perform better than the original one The result proved that it worked a little better than its original version [AI Magazine](#) ,1985 *2002 IEEE International Conference on Data Mining* Vipin Kumar,2002
