The authors emphasize simplicity but still explore important concepts of Managed DirectX 9.0 such as Direct3D DirectSound DirectMusic using the COM interface DirectInput including force feedback joysticks DirectShow and DirectPlay. Additional chapters discuss game programming technologies Speech API for generating character voices GDI for simple games and multithreading. A bonus chapter even shows you how to port a simple game to a Pocket PC. The book includes two chapters worth of sample games. The first presents a game with simple features the second extends that game and presents additional concepts. A library of game programming helper classes is also created step by step in both chapters.

Communicating Process Architectures 2017 & 2018 J. Bækgaard Pedersen, K. Chalmers, J.F. Broenink, 2019-03-26. Concurrent and parallel systems are intrinsic to the technology which underpins almost every aspect of our lives today. This book presents the combined post proceedings for two important conferences on concurrent and parallel systems: Communicating Process Architectures 2017 held in Sliema, Malta in August 2017 and Communicating Process Architectures 2018 held in Dresden, Germany in August 2018. CPA 2017: Fifteen papers were accepted for presentation and publication; they cover topics including mathematical theory, programming languages, design and support tools, verification and multicore infrastructure and applications ranging from supercomputing to embedded. A workshop on domain specific concurrency skeletons and the abstracts of eight fringe presentations reporting on new ideas, work in progress or interesting thoughts associated with concurrency are also included in these proceedings. CPA 2018: Eighteen papers were accepted for presentation and publication; they cover topics including mathematical theory, design and programming language and support tools, verification, multicore run time infrastructure and applications at all levels from supercomputing to embedded. A workshop on translating CSP based languages to common programming languages and the abstracts of four fringe presentations on work in progress, new ideas as well as demonstrations and concerns that certain common practices in concurrency are harmful are also included in these proceedings. The book will be of interest to all those whose work involves concurrent and parallel systems.
