### Section 2: Scientific Proposal

#### 1. State-of-the-art

##### 1.1. Native South American languages

Although Spanish and Portuguese are the primary languages for almost the complete human population of South America, there are actually more than 500 languages spoken in this part of the world (Gordon & Grimes 2005, slightly lower estimates of the number of living languages can be found in Campbell 1997: 170 and Fabre 1998). Most of these languages are so-called ‘native’ languages predating European conquest, most probably direct descendants of the languages of the first human populations entering this continent. Although human populations only entered this part of the world relatively recently (when exactly is controversial), and notwithstanding the very early descriptive and comparative interests by linguists for these languages (the first grammars and dictionaries were published in the 16th century, and the first linguistic families were proposed in the 18th century, cf. Campbell 1997: 29 ff.), still very little is known about the linguistic phylogeny of South American languages. This project aims to unravel the linguistic events that shaped the languages of this continent.

Currently, there is broad consensus about the existence of a few major linguistic families in South America (e.g. Arawakan, Cariban, Tupian, Tucanoan, Chibchan, Quechuan, Panoan), and very many small and shallow groups of related languages, many of which have only one or two member-languages spoken today (Campbell 1997: 170 ff.). Both the details of the internal structure of the accepted groups, and the relation between the many linguistic families, both large and small, are still open questions. Partly, this lack of knowledge is caused by the relatively limited amount of research that has attempted to unravel the linguistic pre-history of South American languages, and by the fact that only relatively recently have broad descriptive efforts started to document more than just the few major native languages of this continent.

The special geographical formation of South America, which is dominated by large mountain ranges and large tropical river basins, has probably also lead to a much more intermingled linguistic situation compared to many other parts of the world. Cross-linguistically, mountain ranges often have an intermingled linguistic situation (cf. the Caucasus or New Guinea), probably caused by valley-wise spread of languages, with older reclusive groups isolated at the end of valleys. Tropical river basins have the special property that populations spread almost exclusively along the rivers, with newer populations settling in between existing groups, or passing them by completely. This leads to the strikingly non-continuous geographic distribution of related languages.

The approach taken by this project to uncover deeper and more detailed genealogical relationships between the languages in South America is to bring together as much as possible of the information available about these languages, and to develop computer-assisted methods to quantify the analysis of all this data. The basis for the quantification will be the historical-comparative method.

##### 1.2. The historical-comparative method

The historical-comparative method to uncover genealogical relationships between languages is an established and highly refined approach, informed by more than two centuries of experience and application. This method is based on the detection of homologous strings of sounds between languages, called ‘cognates’. Shortly summarized, the historical development of phonemes is established on the basis of a sizable set of

### **Erc Starting Grant Research Proposal Part B2 Introduction**

In today's digital age, the availability of Erc Starting Grant Research Proposal Part B2 books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Erc Starting Grant Research Proposal Part B2 books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Erc Starting Grant Research Proposal Part B2 books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Erc Starting Grant Research Proposal Part B2 versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation.

Furthermore, Erc Starting Grant Research Proposal Part B2 books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Erc Starting Grant Research Proposal Part B2 books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Erc Starting Grant Research Proposal Part B2 books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries

often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Erc Starting Grant Research Proposal Part B2 books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Erc Starting Grant Research Proposal Part B2 books and manuals for download and embark on your journey of knowledge?
