Essential Oils Contact Allergy And Chemical Composition:

Essential Oils Anton C. de Groot, Erich Schmidt, 2021-04-12 *Essential Oils Contact Allergy and Chemical Composition* provides a full review of contact allergy to essential oils along with detailed analyses of the chemical composition of essential oils known to cause contact allergy. In addition to literature data, this book presents the results of nearly 6,400 previously unpublished sample analyses by far the largest set of essential oils analyses ever reported in a single source of scientific literature. Covering 91 essential oils and two absolutes, the book presents an alphabetical list of all 4,350 ingredients that have been identified in them, a list of chemicals known to cause contact allergy and allergic contact dermatitis, and tabular indications of the ingredients that can be found in each essential oil. The book discusses contact allergy and allergic contact dermatitis for each of the oils and absolutes, sometimes able to provide only one or two reports but drawing upon considerable amounts of literature in other cases such as with tea tree oil, ylang ylang oil, lavender oil, rose oil, turpentine oil, jasmine absolute, and sandalwood oil. While limited information on the main components and their concentrations would be enough for most dermatologists, this book gives extensive coverage not only to improve levels of medical knowledge and quality of patient care but also for the benefit of professionals beyond clinical study and practice such as chemists in the perfume and cosmetics industries, perfumers, academic scientists working with essential oils and fragrances, aromatherapists, legislators, and those involved in the production, sale, and acquisition of essential oils. *Monographs in Contact Allergy, Volume 1* Anton C. de Groot, 2021-03-25 *Monographs in Contact Allergy Volume 1 Non-Fragrance Allergens in Cosmetics Part 1 and Part 2* is the first 2-part volume in an exciting series on contact allergy. It presents over 500 natural or synthetic chemicals and compounds which have caused allergic contact dermatitis in cosmetic products. Included here are INCI names, synonyms, description, definition, CAS and EU numbers, chemical class, function in cosmetics, molecular formula, structural formula, and advice on patch tests. A full literature review is given of patch testing in patients, case reports of cosmetic allergic contact dermatitis, irritant contact dermatitis, photosensitivity, immediate contact reactions, and systemic side effects. This text is suitable for anyone with an interest in contact allergy, from university students to professionals, and all readers will find this informative and detailed series an invaluable resource. **Key Features:** Monographs of all known non-fragrance chemicals and substances which have caused allergic contact dermatitis from their presence in cosmetic products. Provides lists of all functional groups such as antioxidants, preservatives, artificial nail building emollients, hair dyeing, hair colorants in both the EU and US formats and all chemicals in these groups which have caused cosmetic allergy. Presents an alphabetical list of all synonyms indicating their INCI names. Reported cross reactions, pseudo cross reactions, and co reactions, patch test sensitization, and presence in cosmetic products including data from FDA's Voluntary Cosmetic Registration Program and chemical analyses are discussed. Covers an extensive amount of information to benefit dermatologists, allergists, and non-medical professionals involved with the research, development, and marketing of cosmetic products. *Essential Oils* Anton C.

It covers the discussion on biomass as a source for cosmetics from savanna, marine, and tropical forest, trend and market outlook of biobased cosmetics, active substances from biomass for cosmetics, extractives from biomass for cosmetics, other non-wood forest products such as essential oil, tengkawang, and bee pollen. Besides that, the potency of biopolymers such as lignin and polysaccharides are presented. The book also discusses activated carbon as a cosmetic source. To present more comprehensive information, it covers biomass as anti-aging, anti-acne, sunscreen, anti-melanin, and antimicrobial. Regarding the close contact system with the human in daily life, cosmetic needs to comply with the human system. Therefore, one special chapter is dedicated to presenting the compatibility view of biobased cosmetics in the human body system. Nanomaterials in cosmetics have started to be used by many beauty companies, as indicated by nano-related patents. The nanotechnology applications in cosmetics also provide future trends in bio-based cosmetics. Some forms of nanomaterials that have been reported include liposomes, nanoemulsion, nanocapsules, solid lipid nanoparticles, nanocrystals, nano-silver, nano-gold, hydrogel, etc. Iodinated Aloe Vera formulations within polymeric complexes present examples of bio-antimicrobials, and such compounds are at the crossroads between pharmaceuticals and cosmetics. Finally, the environmental and safety impacts of biobased cosmetic development are discussed as the closure in the last chapter. This book is expected to provide insightful information for those dealing with biomass or doing research on biomass for sustainable living. Moreover, it is also suitable for policymakers to get the new and latest information on valorizing local biomass while expanding its usage for cosmeceutical purposes. Due to the current environmental problems occurring in our surroundings, this book is seen to be an important tool to spread awareness of the smart way of utilizing our precious biomass and transforming it into valuable products. **Monographs in Contact Allergy: Volume 2** Anton C. de Groot, 2021-03-22 This second volume in an exciting and detailed series on contact allergens provides monographs of all 181 fragrances and 79 essential oils which have caused contact allergy, allergic contact dermatitis, including the indicators for fragrance allergy.
