Global Financial Networked Governance Peter Knaack,2022-12-30 Global Financial Networked Governance provides a careful analysis of the Financial Stability Board FSB and the standard setters under its umbrella to show how such government networks harness the power of public reputation to herd their members into compliance The FSB s track record in coordinating global financial regulatory reform is uneven Some items on its agenda have seen the rapid evolution of globally coordinated regulatory standards and their implementation by all member states sometimes even ahead of the stipulated timelines In contrast other initiatives have stalled at different stages of the policymaking process global coordination is lacking deadlines have been missed and it is currently unclear when the post crisis financial reform project will come to completion if ever In this book the author asks the question why has the FSB succeeded in some areas of its global financial regulatory coordination work and not in others The book traces the global policymaking process in three major issue areas banking regulation Basel III over the counter OTC derivatives and ending too big to fail Through a combination of careful process tracing and rigorous testing against alternative explanations it challenges the existing literature by revealing that the institutional pathway of policymaking is the main predictor of FSB progress It shows that government networks on their own have succeeded in implementing globally coherent safety standards In contrast legislation and legislators in key G20 countries have limited the power and effectiveness of the FSB The author analyzes the causes and effects of this phenomenon and suggests a novel institutional solution to the effectiveness legitimacy dilemma that global governance forums face combining the advantages of functional specialization and electoral accountability This book will be of great interest to graduate students academics working at the intersection of economics political science and international law students of the FSB in particular and policymakers in global economic governance
