The Enemy in the Bush Derrick C. Darden PhD,2020-11-09 VETERAN LEADERSHIP EMPOWERMENT *The Enemy in the Bush* is a book that takes you through an adventure and journey of one s man s life from growing up in the ghetto of Newark New Jersey to becoming a decorated military veteran of more than 22 years In it he shares how he navigated a multitude of life challenges and consciously determined what direction his life would take and how he was going to be purposeful on this earth how he would discover and fulfill his destiny Derrick has always believed that you determine your destiny on this earth And that it is our determination to overcome life s challenges that dictates how we live our lives how we conduct ourselves in every situation Unfortunately many of us have not developed the discipline and life skills that are required to overcome adversity thereby limiting our ability to accomplish our major life goals He however has learned that when we are willing to look within ourselves for answers rather than becoming fixated on our current circumstances and areas in which there appears to be a lack we automatically empower ourselves to find greater inner strength and hope Most importantly we get to a place where it is impossible for us to find excuses for not achieving our goals due to external factors Instead we begin to see that the true Enemy in the Bush is our internal demons negative thinking and other limitations that we place on our ourselves By sharing his life story and Five Key Principles that have helped him successfully navigate life s challenges and accomplish many of his major life goals his hope is that this book will equip you with the ability to identify and conquer the Enemy in the Bush at every stage of your life *12 Ignored Truths When Picking a Life Partner* B.A. Crisostomo,2023-05-02

Why Rush Into Marriage If love and attraction are all you need for a happy and long lasting marriage why do so many great relationships end in a breakup Why is cohabitation becoming more common while marriages are becoming less common In the past our ancestors usually didn t get married because they loved each other Instead they did it to join families and raise children together Their marriages were usually set up by their parents and they would start with a betrothal They lacked the same benefits rights and systems that modern spouses in many countries enjoy Can we say that the relationships between modern couples are better than those of our ancestors given that mutual love is the main reason people get married today This book talks about the truths most would be couples ignore before they decide on their own to get married Once their marriage becomes miserable they start to realize that they made mistakes in their choice of partner **Essential**

Oceans Rise Empires Fall Gerard Toal,2024 A powerful explanation of why geopolitical competition makes implementing effective climate change policies so difficult As the Russia Ukraine war has shown great power competition drives states to prioritize fossil fuel acquisition over working toward a zero carbon future In the last few years it has become abundantly clear that the effects of accelerating climate change will be catastrophic from rising seas to more violent storms to desertification Yet why do nation states find it so difficult to implement transnational policies that can reduce carbon output and slow global warming In **Oceans Rise Empires Fall** Gerard Toal identifies geopolitics as the culprit States would prefer to reduce emissions in the abstract but in the great global competition for geopolitical power states always prioritize access to carbon based fuels necessary for generating the sort of economic growth that helps them compete with rival states Despite what we now know about the long term impacts of climate change geopolitical contests continue to sideline attempts to halt or slow down the process The Ukraine conflict in particular exposes our priorities To escape reliance on Russia s vast oil and gas reserves states have expanded fossil fuel production that necessarily increases the amount of carbon in the atmosphere The territorial control imperatives of great powers preclude collaborative behavior to address common challenges Competitive territorial resource and technological dramas across the geopolitical chessboard currently obscure the deterioration of the planet s life support systems In the contest between geopolitics and sustainable climate policies the former takes precedence especially when competition shifts to outright conflict In this book Toal interrogates that relationship and its stakes for the ongoing acceleration of climate change
